1 General information

Duvets and pillows must be OEKO-TEX Standard 100 certified and comply with OEKO-TEX requirements in [General Requirements](#). The OEKO-TEX label can be either on care label or on separate label.

Duvets and pillows must comply with [JYSK 4004](#) unless otherwise specified.

Duvets and pillows must comply with French degree **EN 12952-1** requirements according to [General Requirements](#).

Down and feather duvets and pillows must comply with **EN 13186**, and the recommended values in **EN 12935** Annex A, Table A.

Duvet and pillow sizes must comply with the measurement list stated in [Table 1](#).

Table 1 – Languages on duvets and pillows

2 Quality requirements

Quality requirements must comply with [Table 2](#).

Requirement:		Tolerance:	Test method:
Fabric			
Size	Before washing	+4/-0% nominal dimension	According EN 1167 (Duvets including fiber duvets must be measured according to EN 1167)
	After washing and drying	+4/-2% nominal dimension	According to ISO 3759 Flat made-up article
Fiber composition		JYSK 4004	AATCC 20A
GSM		±2%	ASTM D3776/D3776M
Thread count		±3 threads in the warp and weft	ASTM D3775
Yarn count		±5%	ASTM D1059
Pilling		≥3-4	ISO 12945-2
Color fastness		General textile quality requirements	JYSK 4004
Filling			
Net fill weight		±5%	EN 13088
Species		According to agreed specifications	EN 12934
Fill power*		±5%	EN 12130-A
Content	Total down	According to agreed specifications	EN 12131
	Other elements	According to agreed specifications	EN 12131
	Down cluster	According to agreed specifications	EN 12131
	Landfowl	According to agreed specifications	EN 12131
	Total waterfowls feathers	According to agreed specifications	EN 12131
Basic	Oxygen number	Max 20mg/100g	EN 1162
	Turbidity	>300 mm	EN 1164
	Class	According to agreed specifications	EN 12131
TOG		According to agreed specifications	BS 5335-1

Table 2 - Textile quality requirements

Note: *Fill power must be measured according to **EN 12130** (2018)

- 6.1 Method A: Steam conditioning.
- 3.2 Massic volume, Note 1 to entry; cubic inches (CUIN) per 30 grams.

3 Inner cushions with feather filling

Inner cushions with feather filling must comply with following requirements:

- Fabric, size and construction according to agreed specifications.
- Feather length must maximum be 5 cm measured from the top of the feather.

Example 1 - Example of measurement of a feather

4 Foam requirements

Pillows with foam must comply with [JYSK 3002](#).

5 Labelling requirements

5.1 General labelling requirements

General labelling for both duvets and pillows must comply with following:

- General labelling must comply with [JYSK 6101](#).
- Care labels must comply with [JYSK 6004](#).
Note: Care label must be taffeta or polyester satin according to agreement with [CAM](#).
- The supplier must ensure that labels comply with [Table 1](#).
- Labelling of down and feathers must comply with [General requirements](#), **EN 12130**, **EN 12131** and **EN 12934**.

5.2 Corner labels

JYSK will stop the use of corner labels on articles under the JYSK and KRONBORG brand by 31. August 2023.
 Articles shipped to JYSK after 1. September 2023 must be with flag labels. Exceptions must be approved by [CAM](#).

5.3 Flag labels

Flag labels must be on both pillows and duvets. Flag labels must comply with requirements in [Figure 1](#).

KRONBORG flag label is made available as [JYSK 60013](#).

Scandinavian Sleeping & Living flag label is made available as [JYSK 60018](#).

COLORS

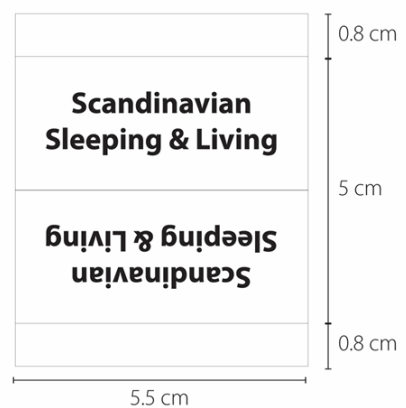

GOLD - KRONBORG

Kronborg
 Woven
 100D
 288 Warp– 580 weft
 160 gsm total label

PLUS - JYSK

Scandinavian sleeping & Living
 Woven
 100D
 320 warp – 612 weft
 164 gsm total label

Figure 1 - Design of KRONBORG flag label and Scandinavian sleeping and living care label

Note: The figure is not drawn to scale.

5.3.1 Label requirements for GOLD

KRONBORG (GOLD) flag label must be placed next to the care label and must comply with placement requirements in [Figure 2](#).

The KRONBORG logo must only be on the flag label. The KRONBORG logo must be removed on the care label.

Additional labels e.g. a Danish flag must comply with [5.3.3](#).

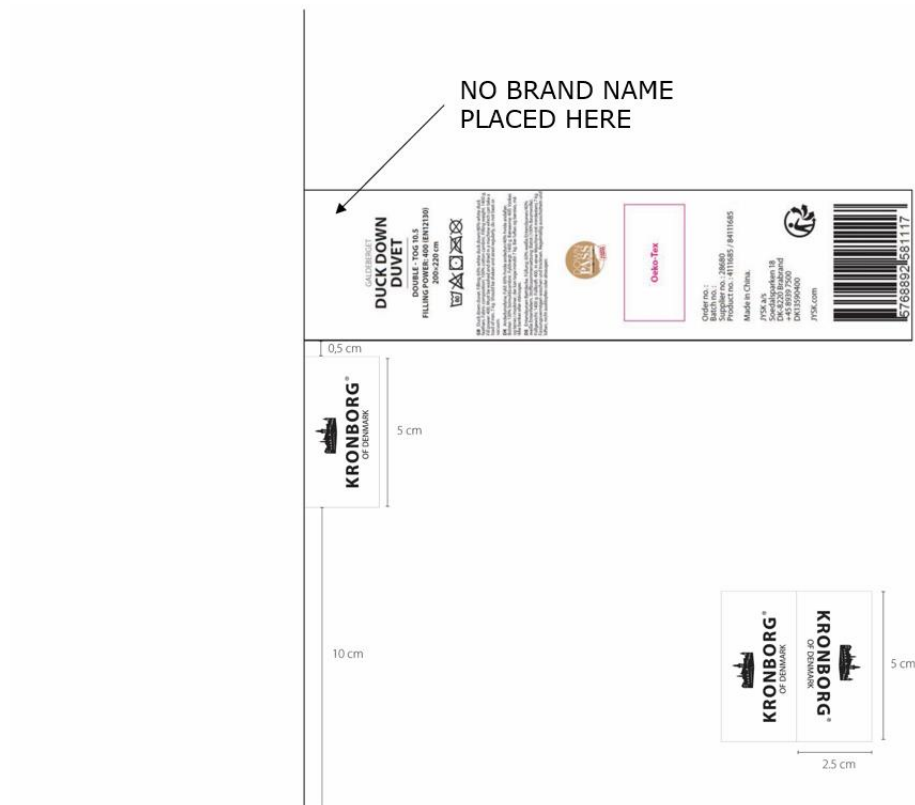

Figure 2 - Correct placement of KRONBORG flag label and care label

Note: The figure is not drawn to scale.

5.3.2 Label requirements for PLUS

Scandinavian sleeping and living (PLUS) flag label must be placed next to the care label and must comply with placement requirements in [Figure 3](#).

Additional labels e.g. a Danish flag must comply with [5.3.3](#).

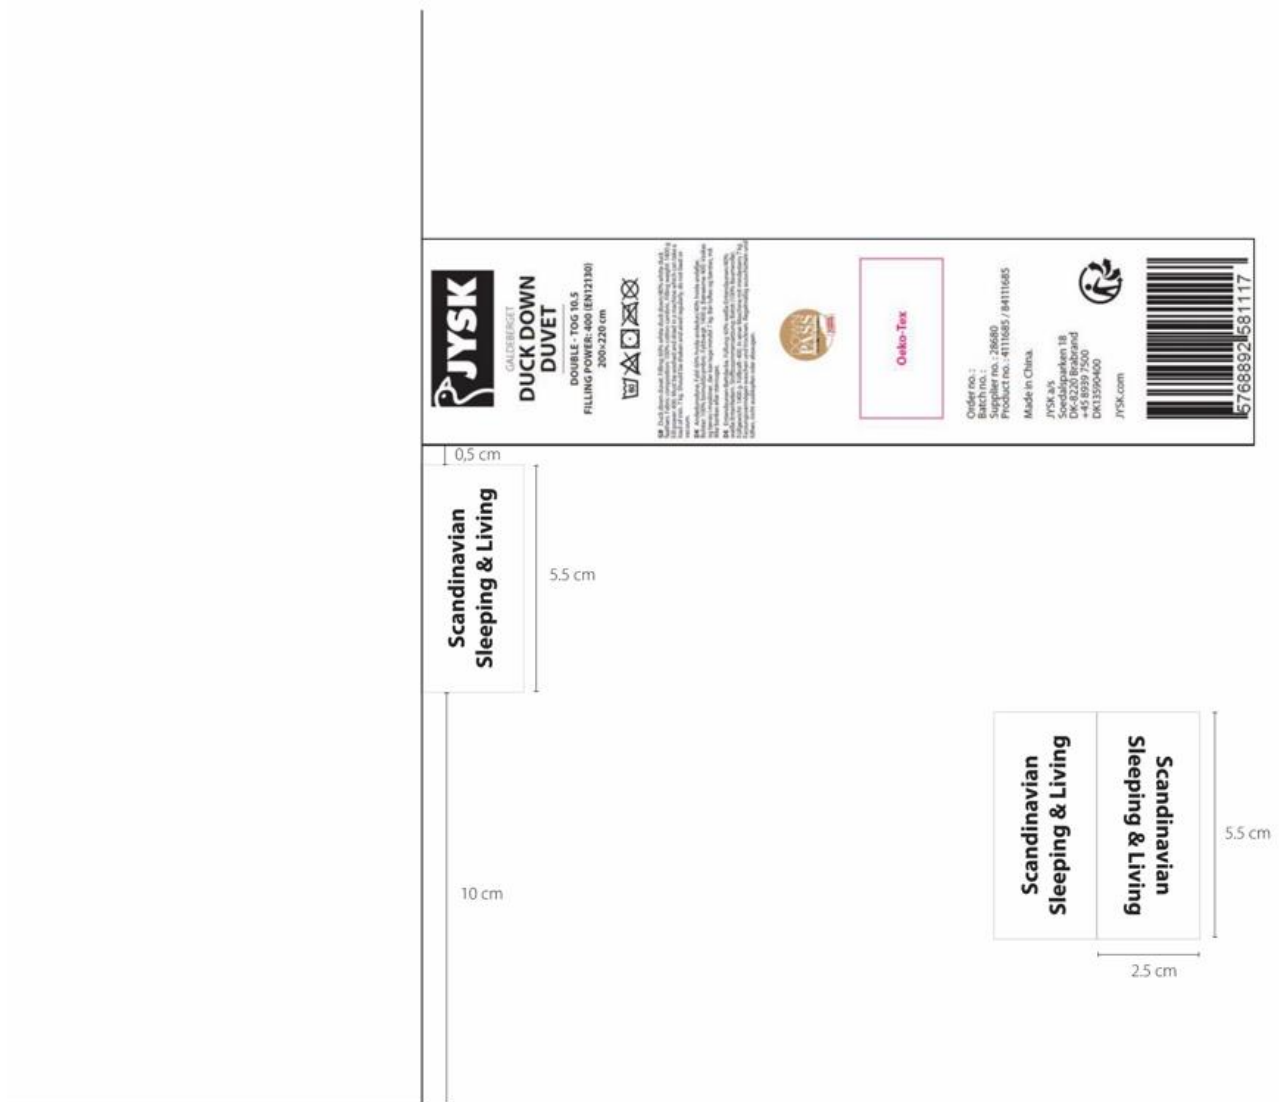

Figure 3 - Correct placement of Scandinavian sleeping and living flag label and care label

Note: The figure is not drawn to scale.

5.3.3 Articles with additional tags

Additional labels e.g. a Danish flag must comply with placement requirements in [Figure 4](#).

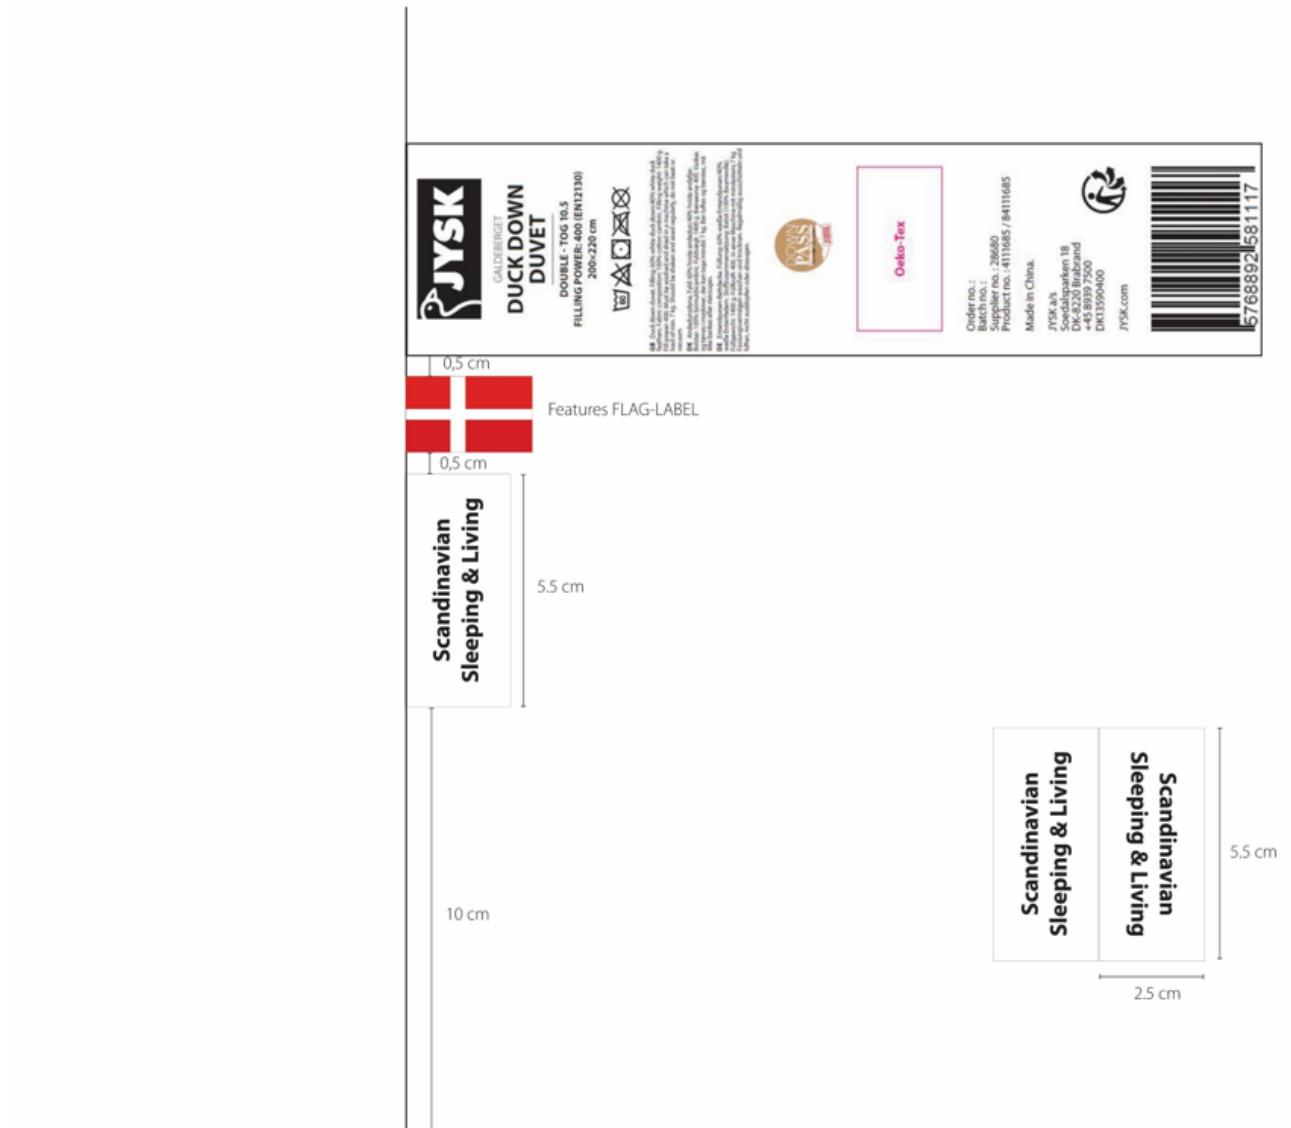

Figure 4 - Correct placement of flag label and care label + additional label (illustrated by the Danish flag)

Note: The figure is not drawn to scale.

On BASIC articles there must not be added additional tags. Care label must comply with placement requirements in [Figure 5](#).

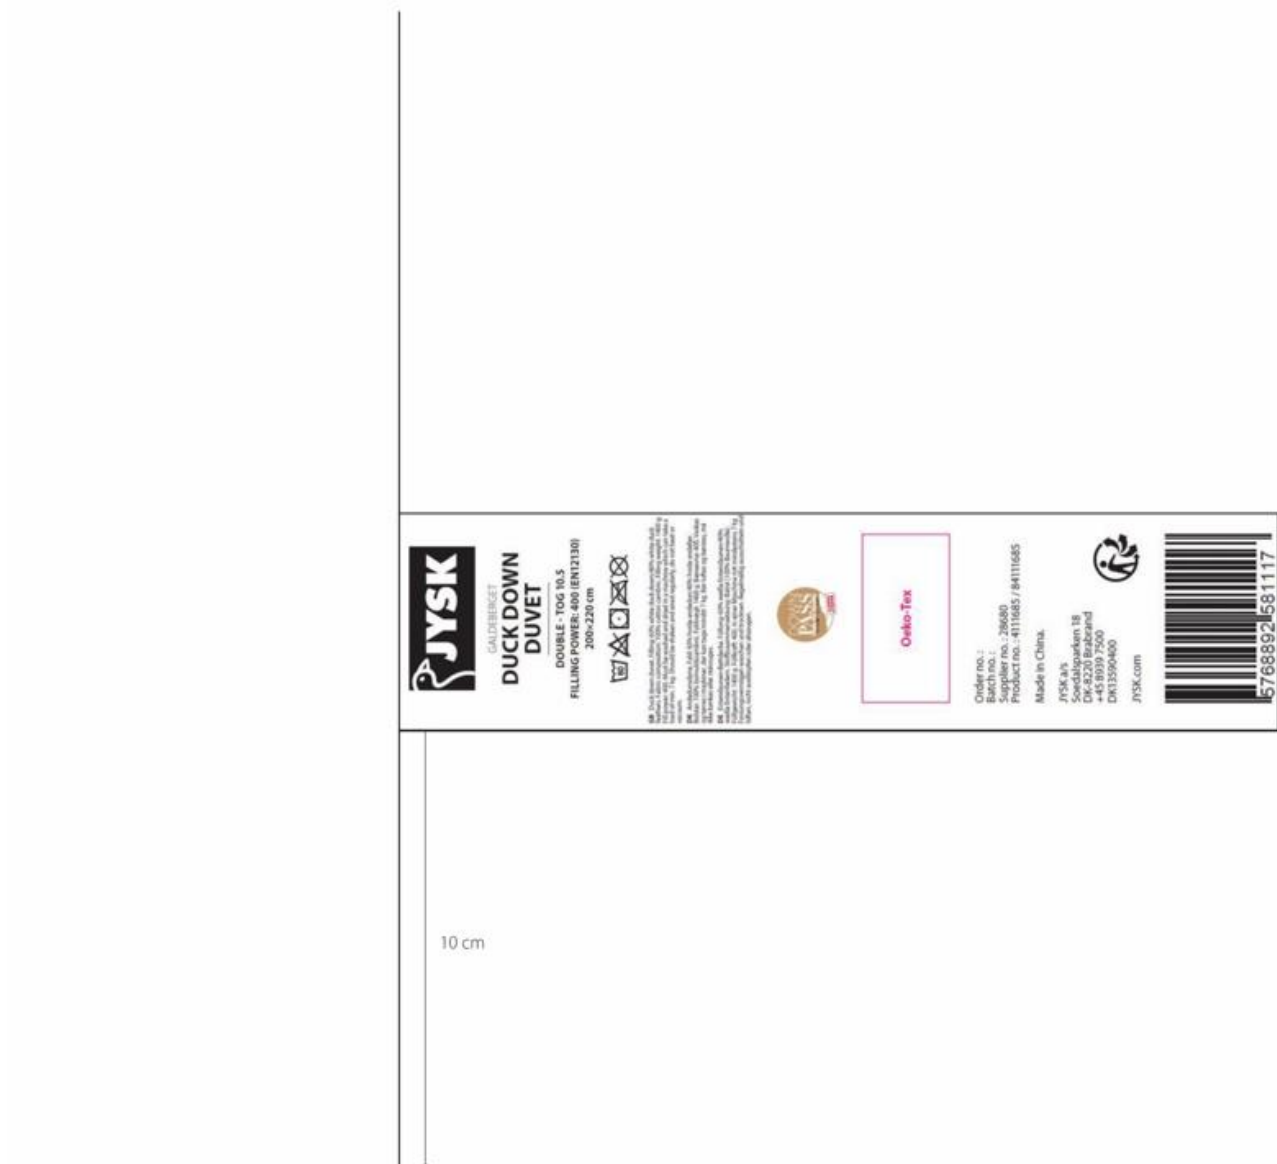

Figure 5 - Correct placement of care label on BASIC articles

Note: The figure is not drawn to scale.

6 UK and Ireland products – Fire retardant and TOG

Special rules apply to products for United Kingdom and Ireland.

6.1 UK and Ireland pillows

UK and Ireland pillows must be Fire Retardant and labelled according to [JYSK 4002](#).

6.2 UK and Ireland duvets

Duvets must have a TOG rating informing the customer about its insulation ability.

The TOG rating must be tested according to **BS 5335-1: 1991**.

There can be exceptions where a size does not go to UK, contact [CAM](#) if in doubt.

On label it must be stated which size the duvet is including the TOG rating:

- Single – TOG (no.)
- Double – TOG (no.)
- King – TOG (no.)
- Super King – TOG (no.)

Example 2 - Example of a section of UK duvet care label with TOG rating

7 Duvet and pillow bags

Duvets and pillows in bags must follow JYSK brand strategy:

- Special brand articles: [CAM](#) must approve special brand bags.
- Private label articles: The below guidelines must be followed regarding JYSK duvet bags.

7.1 Bag size

- Max. Height 40 cm on duvet bag
- Max. Length 60 cm on duvet bag
- Bags must be with an insert at the end because the products are spaced with the end facing out on the shelves
- Width: Can be ordered in the size that fits the specific article (minimum 13,5 cm.)

7.2 Private label bags (JYSK and KRONBORG)

JYSK has brand strategy for private label duvets and pillows to be delivered in bags. These products must be delivered in a design provided by JYSK.

- All bags must be purchased by our designated bag supplier in China. Contact [CAM](#) for further information.
- Prices have been negotiated by JYSK, however they can deviate according to size.
- Pillows and duvets inserts must comply with 'Pillows and Duvet Bag inserts' requirements in [JYSK 6201](#) and the following measurements:
 - Height: 18.3 cm
 - Width: 12 cm

Example 3 - Example of insert measurement

7.2.1 Private label bag types

There are three types of duvet bags:

- **Fibre/Natural – PLUS**

Bag name: 15-ASQ-200

Example 4 - Examples of fibre/natural - PLUS bags

- **Fibre – GOLD**

Bag name: 15-ASQ-201

Example 5 - Examples of fibre - GOLD bags

- **Natural - GOLD**

Bag name: 15-ASQ-202

Example 6 - Examples of natural - GOLD bags

7.3 Pillow bag

There is one type: Fibre/Natural – GOLD

Example 7 - Example of pillow bags

8 Bellyband for duvets

Bellybands for duvets must comply with below requirements:

- Layout must comply with [JYSK 6201](#).
 - Must be 21 cm in height and must comply with cardboard requirements in [JYSK 6001](#).
 - Must be closed with glue or double-sided adhesive tape and strengthened with a transparent round sticker.
- Note:** The glue and tape must not adhere to the product itself.
- The tape must cover the entire closing edge from top to bottom and be ≥ 20 mm in width.
 - The transparent sticker must be neatly placed (centered) on the bellyband closing edge.
 - Must have an overlap ≥ 30 mm. The overlap must be adjusted from packaging to packaging.
 - The placement of the bellyband must be centered lengthwise on the rolled duvet.
 - The bellyband *front* must be placed opposite of the lose end of the rolled duvet.

Note: The diameter of the sales unit is given by the properties of the folded product.

Example 8 - Example of duvet with bellyband

9 Store shelves dimensions

Stores shelf dimensions (EA dimensions) must be filled in by the supplier when filling in the supplier form. The stores shelf dimensions describe the measures of the product when it is placed in the stores see [Table 3](#).

Three measures must be filled in:

- Width (cm)
- Length (cm)
- Height (cm)

Stores shelf dimensions				
•	Width - cm		<input type="checkbox"/>	<input type="text"/>
•	Length - cm		<input type="checkbox"/>	<input type="text"/>
•	Height - cm		<input type="checkbox"/>	<input type="text"/>
•	Volumen - M ³		<input type="checkbox"/>	<input type="text"/>

Table 3 - Supplier form

The measures depend on whether the duvet/pillow is delivered in a bag/box or is folded lying freely on the shelves. To determine the relevant height, depth, and width the pictures below can be helpful.

9.1 Duvets folded

Store shelf dimensions will be measured in the following way see [Example 9](#):

1. Stack 10 duvets on top of one another and measure the dimensions.
2. Divide the height number by 10 to determine the height dimensions of one duvet.

It is necessary to use the "pressed together" dimensions in order to determine how many duvets will fit on the shelf.

Example 9 - Example of duvet measurements

9.2 Duvets in bags

Duvets in bags are always spaced sideways with width facing front, see [Example 10](#)**Error! Reference source not found.**

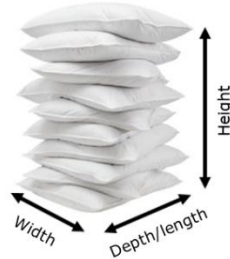

Example 10 - Duvet in bags measurements

9.3 Pillows without packaging

EA dimension for pillows laying freely on the shelves must be measured in the following way see [Example 11](#):

1. Stack 10 pillows on top of one another and measure the dimensions.
2. Divide the height number by 10 in order to determine the height dimension of one pillow.

It is necessary to use the 'pressed together' dimensions in order to determine how many pillows will fit on the shelf.

Example 11 - Pillow measurements

9.4 Pillows in bags

Pillows in bags are spaced sideways with width facing front, see [Example 12](#)~~Error! Reference source not found.~~.

Example 12 - Pillows in bags measurements

9.5 Pillows in boxes

Pillows in boxes are spaced with the front towards the customers, see [Example 13](#)~~Error! Reference source not found.~~.

Example 13 - Pillows in boxes measurements

9.6 WELLPUR accessories

WELLPUR accessories are spaced with the front towards the customers, see [Example 14](#).

Example 14 - WELLPUR accessories measurements

10 Reference and shipment samples – Supplier procedure

The supplier/agents must ensure that the sample's quality match the specification, before sending reference or shipment samples.

If there is a deviation, the samples must not be sent to JYSK, and a new sample must be produced.

If there is a small deviation, which the supplier/agent consider minor, this should be commented and attached to the sample.

Sample requirements:

- Total weight / Net fill weight.
- GSM weight of the fabric.
- Thread count of the fabric using a microscope.
- Label inspection measures: Length, width and depth.
 - Regular proof reading.
 - Correct number of languages according to [Table 1](#).
- Labelling must comply with [JYSK 4004](#).
- Bag must comply with [Z](#).
- Source tag according to [11](#) if needed.
- Make sure sample is labelled correct before sending to JYSK.
- Before sending sample, send an email advising the sample will be sent.

11 Source tagging for Duvets and Pillows

The source tag must comply with and [Table 4](#) and [JYSK 6003](#).

Product type	Placement of source tag	Recommended label
Duvet	According to agreement with CAM : <ul style="list-style-type: none"> • In a pocket-tag inside the duvet before it is filled and sewed • Inside the care label 	40x40 mm or 50x50 mm
Pillow	In the care label or branding label according to agreement with CAM	40x40 mm or 40 mm round label

Table 4 – Source tagging

12 Duvets and pillows for children

Duvet and pillows for children (baby and junior) must be produced and labelled according to **EN 16779-1** and comply with following:

- No corner labels, loop labels, sharp edges, zippers, buttons or other loose parts etc. on the duvet.
- Labels must have a maximum length of 75 mm. Several labels of 75 mm in a bundle are allowed. The width must be 70 mm.
- Plastic- or rubber print on the duvet is not allowed.
- Stricter demands for threads, sewing and seams.
- Added flame-retardants are not allowed.

12.1 Safety requirements and test methods for children's cot duvets

Duvets with a width of 120cm or less, and a length of 140cm or less must comply with **EN 16779-1**.

Each supplier must make sure to comply with the whole standard.

12.2 Labelling on children's duvets

Duvets must have the below information and warnings on label in all the required languages:

- WARNING! Ensure the child's face is uncovered
- WARNING! Keep away from fire
- Declaration of the thermal resistance TOG if available.
- (icon "i") ISO 7000 - 1641 must occur on the label.
- Care instructions (dry cleaning is not allowed).

Note: The warnings are available in JYSK Term database. Type "16779-1" in the Definition field and press enter.

12.2.1 Hangtag/booklet

Duvets must have a hangtag/booklet inside the packaging or fixed to the duvet.

The hangtag/booklet must contain the following purchase information and user instruction in all the required languages:

- Must be headed; IMPORTANT KEEP FOR FUTURE REFERENCE
- WARNING! Ensure child's face uncovered
- WARNING! Do not use in combination with sleep bag or blanket
- WARNING! Not recommended under 12 months (optional)
- WARNING! Keep away from fire
- STOP using cot duvet at the first sign of damages
- Follow the care instructions on the label. Be aware that dry cleaning is not allowed. Take into account the room temperature and the child's sleepwear. Overheating can endanger the life of your child! Baby duvets are recommended for cradles from 40x90 cm. Junior duvets are recommended for cots from 60x120 cm

Note: The warnings are available in JYSK Term database. Type "16779-1" in the Definition field and press enter.

12.3 Plastic packaging (all)

- WARNING! Keep plastic covering away from children to avoid suffocation ([*icon*](#) or text)
