# Assembly instructions and manuals for mattresses, indoor and outdoor furniture

## Contents

This standard describes general requirements for assembly instructions and manuals for mattresses, indoor and outdoor furniture products in JYSK assortment.

## About this standard

The aim of this standard is to clarify the requirements for Assembly instructions and manuals for all JYSK products in categories for mattresses, indoor and outdoor furniture. The standard will include instructions on building informative and precise warnings, assembly, user- and maintenance instructions for JYSK products in these categories.

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

Revision: 18

**Information for reading this document:**

- Throughout this document, the term "manual(s)" will be referring to both an assembly instruction (meant for assembling a product) and a manual (meant for using a product, e.g. massage function in a massage chair, solar lamp)
- The term DOWNLOADS refer to the download area found on the left panel inside Supplier Guideline, here you can find text, templates, pictograms and graphic for inspiration and use, when building assembly instructions and manuals.

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

Revision: 18

## 1 Building the assembly instruction/manual

This is the general information, sketches and layouts for how JYSK wants you to build manuals. JYSK defines manuals into consisting of 4 different instructions as follows:

- Warnings
  - Contains text essential for product safety, use and assembly.
- Assembly instruction (AI)
  - Every product requiring assembly must have an assembly instruction.
- User instruction
  - Required for any products with more than one function, or where the functions is not self-explanatory.
- Maintenance instruction
  - For any product which the supplier assesses has to have specific maintenance instructions, or for products for which maintenance instructions are mandatory, e.g. garden furniture.

Which instructions to be included in the single manual are determined by the product, and a decision made by the supplier and approved by Compliance and Quality.

In the following, there will be a section-by-section review with examples of the JYSK way to build a manual. Please note, that depending on product type, not all sections are relevant or should be included; this will be stated in the related section.

A manual must always consist of a Front Page and warning section following the JYSK guidelines and the standard for the product type.

***It is at all times the supplier's responsibility to keep updated with the current version of any standard relevant for the product type in the countries where the product is sold, and that the product is labeled with warnings according to these standards in manuals.***

- It is of great importance, that this guideline for manuals are followed.
- The manual must be saved as PDF and the file name must contain the JYSK name of the product and the JYSK article number.
- All manuals are to be sent to [assemblyinstructions@jysk.com](mailto:assemblyinstructions@jysk.com). If there are any general questions regarding the design of the manuals, please contact [assemblyinstructions@jysk.com](mailto:assemblyinstructions@jysk.com) (write in English) – JYSK does not approve any manuals, as we can only check layout, print and overall compliance with this standard. It is not possible to evaluate if a product can be assembled by looking at a document, therefore it is always suppliers responsibility the ensure this.
- A-Cad templates for mandatory use for assembly instructions can be found in the [DOWNLOADS](#) section. We strongly require that the supplier use these templates, to make all JYSK assembly instructions looking in the same way.
- All writing in manuals must be with Font Verdana, no smaller than size 6, and with headlines for warnings in ***bold, italic*** writing with CAPITAL letters.
- All manuals must be printed on white paper min. 70g./m<sup>2</sup> and in size A4 (21 x 29,7 cm) portrait page layout, on both sides in a good, clear print and stapled in upper left corner. If the manual is made on paper A3 and folded, it is very important, that staples are placed exactly where the paper is folded.
- For some simple products a manual in A5 size booklet can be accepted. This must be agreed with [compliancequality@JYSK.com](mailto:compliancequality@JYSK.com).
- All pages must be framed, with a frame ~~which is at least~~ 10 mm from papers edges.
- All pages has to be in black/white printing

Revision: 18

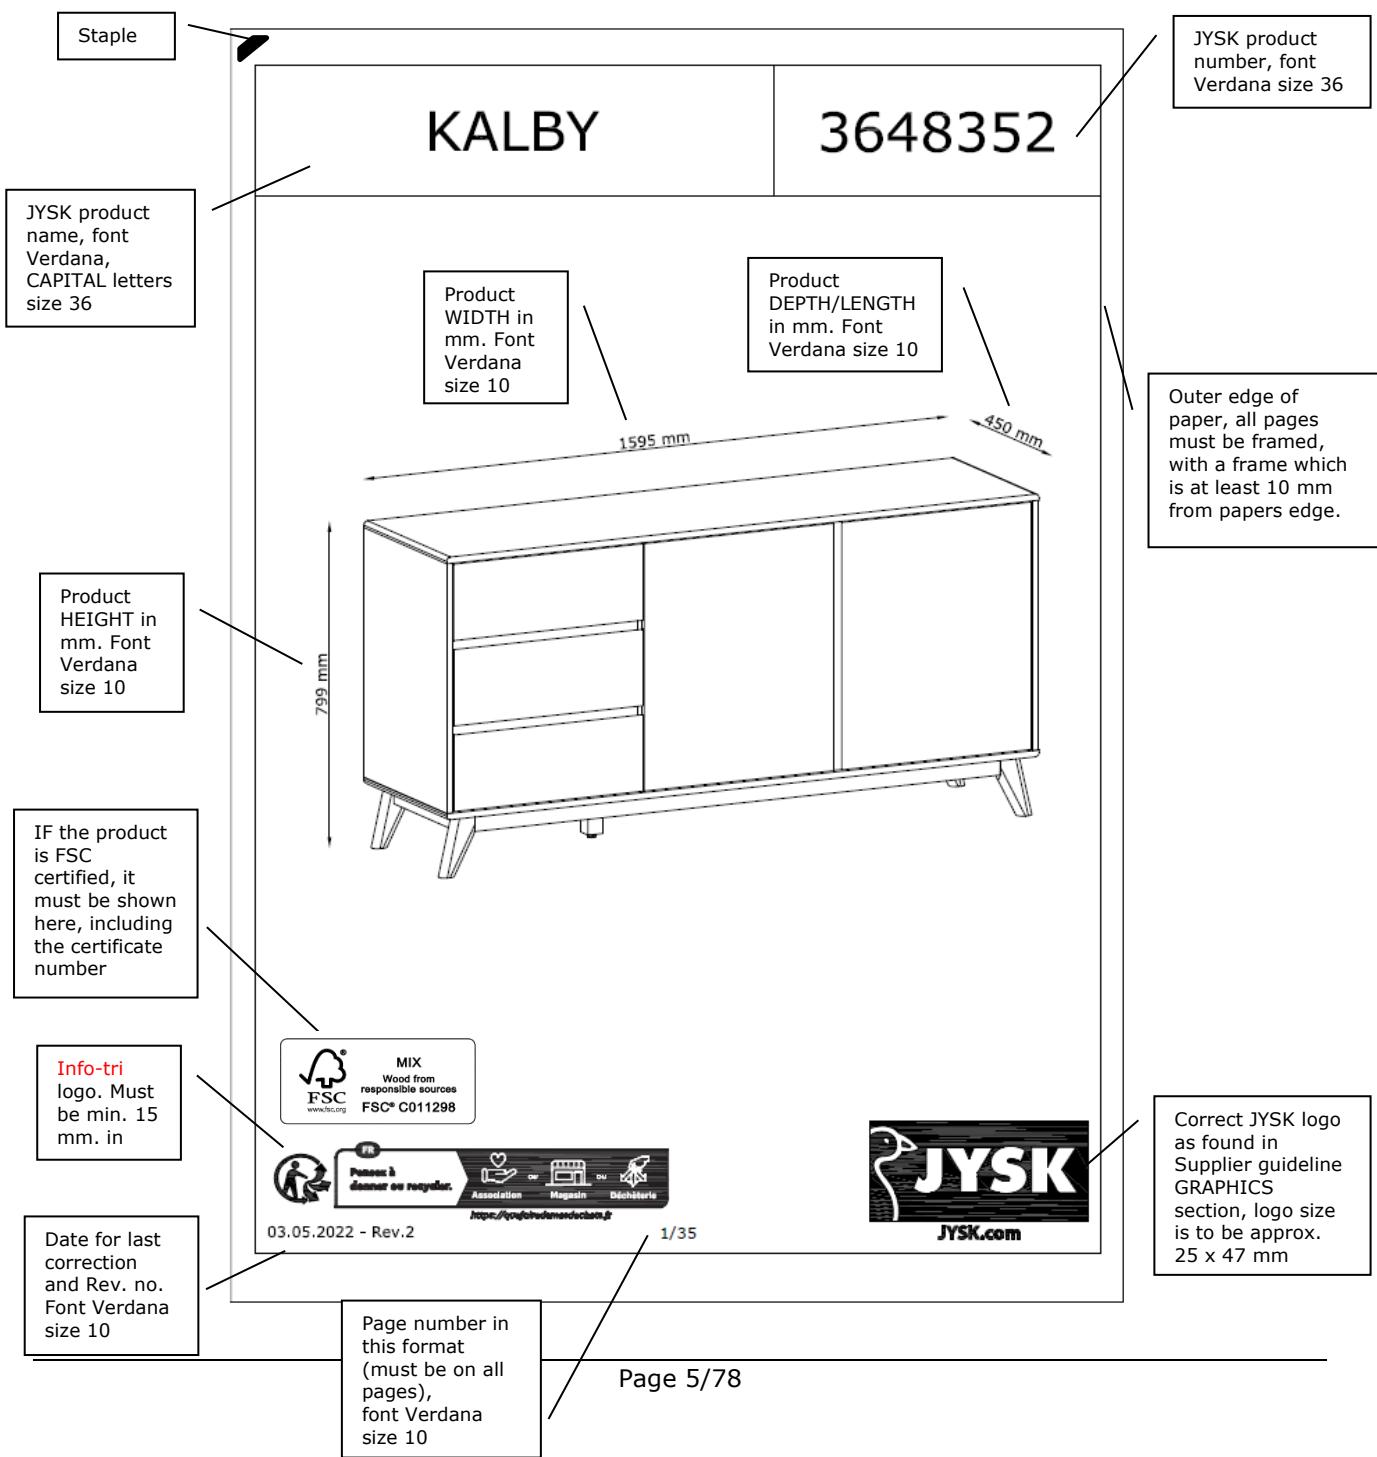

### Translations

IMPORTANT! All writing must be translated to the number of languages currently used by JYSK; some readymade translations for warnings can be found in the Supplier Guideline [DOWNLOADS](#) section. For product specific warnings, it is suppliers own responsibility to make translations. Do not use Google translate and similar!

### 1.1 Front Page

Page 1 (front page) of the assembly instruction or user manual must always show the product in a clear, detailed 3D sketch.

- It must include the exact outer measurements of the product in millimeters. (mm.)
- It must be with the JYSK logo, JYSK product name, JYSK Nordic and DBL article number and the Info-tri logo.
- If the product is made from FCS certified wood, it can be shown on the front page too, with the producer's certificate number.

Document type:

Subject:

**Appendix K - Assembly instructions and manuals**

Date: 20.04.2024

Revision: 18

### 1.1.1 Front page template

JYSK has designed below template to be used as front page in manuals. This and later mentioned templates can be found in the Supplier Guideline [DOWNLOADS](#) section.

<b>PRODUCT NAME</b>	1234567
<p>The template consists of a large central area for drawing. At the top, there are two horizontal arrows pointing outwards from the top edge, each labeled "xxx mm". On the left side, there is a vertical arrow pointing upwards, also labeled "xxx mm". In the center of the drawing area, there is a red rectangular stamp with the text "3D DRAWING" written diagonally across it. At the bottom of the page, there is a footer bar containing the following information: - A circular icon with a person and a recycling symbol. - Text in French: "FR", "Pensez à donner ou recycler.", "Association", "Magasin", "Déchetterie", and the website "https://quefaisiedesbets.fr". - The text "DD.MM.YEAR - Rev.X" on the left. - The text "X/XX" on the right. - The JYSK logo on the right, followed by the text "JYSK.com".</p>

Revision: 18

## 1.2 Important measure page

Page 2 of the assembly instruction must show the product in 2D sketches without fronts (doors and drawers). It must show a top view, front view and side view. On the views, some important and useful measure must be shown.

If the product contains a drawer or shoe storage, the internal size of this must be shown also. This is shown best with a 3D drawing.

The purpose of this page is to inform customers about some important measure e.g. if there is enough space for a DVD or how big the distance is between two legs on a dining table.

Page 2 is mandatory for the types of furniture listed below:

- Storage furniture (Sideboards, TV-units, display cabinets, wardrobes, book shelves, chest of drawers, console tables, bed side tables, shoe racks, small furniture with storage options etc.)
- Desks
- Dining tables
- Beds

For all other furniture types, page 2 shall not be included.

Revision: 18

### 1.2.1 Important measure page for storage furniture:

All manuals for storage furniture must include the important measure page with following measure:

- External height, length and depth
- Width of all shelves
- Depth of shelves
- Height between shelves and top plate/bottom plate including the distance the shelves can be moved
- Distance from floor to bottom plate or bottom rail if the distance is >50 mm.
- Internal size of drawer or shoe storage

See example for a sideboard below:

### 1.2.2 Important measure page for desks:

All manuals for desks must include the important measure page with following measure:

- External height, length and depth
- Space for seating. Both the width and the height must be shown
- Height between shelves and top plate/bottom plate including the distance the shelves can be moved
- Distance from floor to bottom plate or bottom rail if the distance is >50 mm.
- Internal size of drawer or shoe storage

See example below:

Revision: 18

### 1.2.4 Important measure page for beds:

All manuals for beds must include the important measure page with following dimensions:

- External height (for both head- and foot end), length and width
- Distance between head- and foot end and between bedsides (size for mattress)
- Distance from floor to upper side of support list
- Distance from floor to underside of bedside

### 1.3 Warnings

The warning section is the next part of the manual and will show mandatory warnings, and depending on product type special warnings translated into all the languages used by JYSK. Please see layout of warnings here below.

The order of the warnings used in each manual must follow the order of the warnings here below. Means the correct order should be warning 1.3.1, 1.3.2 and so on.

The related pictogram for a warning has to be shown with the warning text in manuals, and if necessary in the related steps as well.

Below shown warning texts and pictograms can be found in the [DOWNLOADS](#) section of JYSK supplier guideline. It can be found both as separate files, but also with pictogram and warning text combined in one document.

If you wish to add additional warnings or maintenance instructions, please get warning text and pictogram approved by [compliancequality@JYSK.com](mailto:compliancequality@JYSK.com) firstly.

**For translated warnings provided by JYSK it is NOT allowed to change any text without approval from Compliance and Quality.**

**Figure 1: Warning symbol, watermark version.**

**The watermark version is to be used together with any warning text.  
Size should be approximately 115 x H.100 mm.**

Document type:

# JYSK Standard

Doc.no: JYSK 5001

Subject:

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

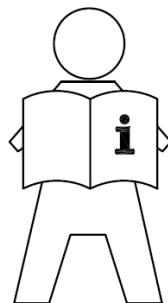

Revision: 18

### 1.3.1 Mandatory warning for all products

This warning must be in all manuals and must include a pictogram (figure 2).

#### IMPORTANT INFORMATION!

Please read the entire manual carefully before starting to assemble and/or using this product. Follow the manual thoroughly and keep it for further reference.

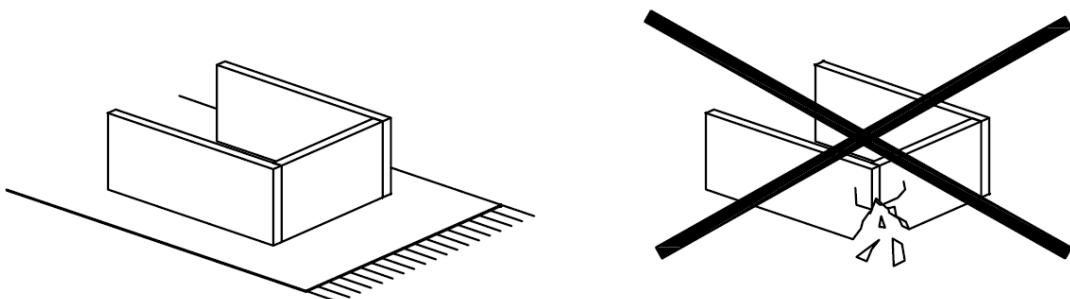

**Figure 2: Pictogram to be used together with mandatory warning text.  
Size of pictogram must be 40 mm. in high.**

### 1.3.2 Mandatory warning to avoid scratching of product parts

Scratching of product parts during assembly can cause many claims; therefore it is important that a warning and pictogram (figure 3) against this is included in all assembly instructions.

#### WARNING TO AVOID SCRATCHES!

To avoid scratching this furniture should be assembled on a soft layer - could be a rug.

**Figure 3: Pictogram to be used together with avoiding scratches warning text.  
Size of pictogram must be 40 mm. in high.**

### 1.3.3 Mandatory warning for all furniture with anti-topple bracket

This warning text and related pictogram (figure 4) must be in all assembly instructions and manuals if the product has anti-topple bracket(s) (see requirements for anti-topple brackets in appendix D – JYSK Category Standard, Indoor Furniture).

#### ANTI-TOPPLE WARNING!

This product must be permanently fixed to the wall with the metal bracket(s) included, to avoid fatal injury in case it topples over. The pack only contains screws for fastening the anti-topple metal bracket(s) itself to the product. Please contact a DIY or hardware store for advice on the correct type of screws/rawlplugs for your type of wall.

Date: 20.04.2024

Revision: 18

**Figure 4: Pictogram to be used together with anti-topple warning text and in related steps in assembly instruction. Size of pictogram must be 40 mm. in high.**

### 1.3.4 Mandatory warning regarding screws for hanging

This warning text and related pictogram (figure 5) must be in all assembly instructions and manuals if the product is to be mounted on a wall. That is typical products such as mirrors, coat racks, wall shelves, etc.

It shall NOT be used for products containing anti-topple bracket(s).

#### **IMPORTANT!**

Mounting screws are not included.

Always make sure that the fastening method you choose is suitable and safe for your home.

**Figure 5: Pictogram to be used together with screws for hanging warning text and in related steps in assembly instruction. Size of pictogram must be 40 mm. in high.**

### 1.3.5 Mandatory warning for desk chairs (BASIC).

This warning text and related pictogram (figure 6) must be in all assembly instructions and manuals if the product is a desk chair (BASIC) and it is tested according to EN 12520.

#### **WARNING FOR DESK CHAIRS!**

This desk chair is tested for domestic use. Tested for 110 kg.

Do not use the desk chair unless all screws are fully tightened, check this every 3 month and re-tighten if necessary.

Only trained personnel may replace or repair seat height adjustment components with energy accumulators.

For safety reasons the castors are designed to lock automatically, when the desk chair is not in use. The lock is released automatically when the seat is loaded.

Document type:

# JYSK Standard

Doc.no: JYSK 5001

Subject:

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

Revision: 18

### 1.3.6 Mandatory warning for office chairs (PLUS and GOLD)

This warning text and related pictogram (figure 6) must be in all assembly instructions and manuals if the product is an office chair (PLUS and GOLD) and it is tested according to EN 1335.

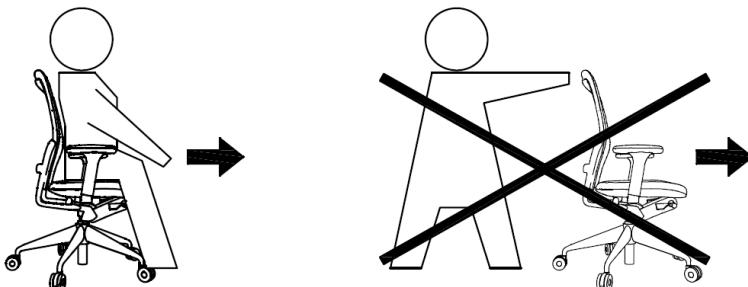

#### **WARNING FOR OFFICE CHAIRS!**

This office chair is tested for office use and tested for one person. Tested for 110 kg.  
Do not use the office chair unless all screws are fully tightened, check this every 3 month and re-tighten if necessary.

Only trained personnel may replace or repair seat height adjustment components with energy accumulators.

For safety reasons the castors are designed to lock automatically, when the office chair is not in use. The lock is released automatically when the seat is loaded.

The castors are suitable for any type of floors.

**Figure 6: Pictogram to be used together with warning texts for office chairs.**  
**Size of pictogram must be 40 mm. in high.**

### 1.3.7 Mandatory warning regarding chairs and stools (One person seater)

This warning text must be in all assembly instructions and manuals if the product is a chair, arm chair, lounge chair or stool etc. and it is tested according to EN 12520.

This warning should not contain any pictogram.

#### **WARNING FOR SEATING FURNITURE!**

This seating furniture is tested for domestic use. Tested for 110 kg.

### 1.3.8 Mandatory warning regarding sofas and benches (Two or more person seater)

This warning text must be in all assembly instructions and manuals if the product is a sofa or bench and it is tested according to EN 12520. This warning should not contain any pictogram.

#### **WARNING FOR SEATING FURNITURE!**

This seating furniture is tested for domestic use. Tested for 110 kg. per seat.

Document type:

# JYSK Standard

Doc.no: JYSK 5001

Subject:

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

Revision: 18

### 1.3.9 Mandatory warning regarding re-tightening

Most products assembled by any kind of screws and likewise, will over time become loose and more unstable, especially for tables and chairs. Therefore it is very important that a warning making customers aware of the importance of re-tightening is included in the assembly instruction. This warning should not contain any pictogram.

#### **IMPORTANT!**

It is important that any product which is assembled using any kind of screw is re-tightened 2 weeks after assembly, and once every 3 months - to assure stability throughout the lifespan of the product.

### 1.3.10 Mandatory warning regarding all products containing TEMPERED GLASS

All products containing elements made of tempered glass must have a warning regarding the handling of tempered glass. This warning should not contain any pictogram.

#### **WARNING REGARDING TEMPERED GLAS!**

- Do not strike glass with hard or pointed items
- Do not use the glass as a chopping surface
- Do not sit or stand upon glass surface(s)
- Do not place very hot – or very cold items in direct contact with the glass surfaces(s)
- Only clean glass using a damp cloth with washing up liquid or soft soap, do not use any substances containing abrasives since they scratch the glass
- If the glass is chipped or broken, stop using the product and consult JYSK store

### 1.3.11 Mandatory warning regarding Furniture

This warning text and related pictogram (figure 7) must be in all assembly instructions and manuals if the product is made of wood, veneer, painted MDF/HDF/chipboard, melamine, laminate, PP, Steel etc.

#### **GENERAL INSTRUCTION FOR FURNITURE SURFACES**

Wipe clean with a damp cloth. Use only water or a gentle detergent.  
Wipe dry with a clean cloth.

**Figure 7: Pictogram to be used together with warning text for products made of wood or wood composites, PP, Steel, and for products covered in fabric (see 1.2.11).**  
**Size of pictogram must be 40 mm. in high.**

Document type:

# JYSK Standard

Doc.no: JYSK 5001

Subject:

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

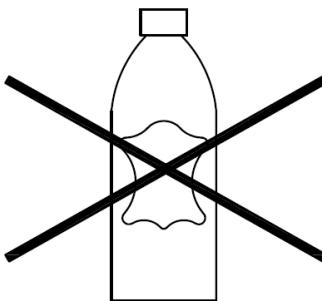

Revision: 18

### 1.3.12 Mandatory warning regarding products covered in PU/bonded leather

This warning text and related pictogram (figure 8) must be in all assembly instructions and manuals if the product is covered in PU/bonded leather.

#### MATERIALS MADE OF PU/BONDED LEATHER!

Products covered in PU/Bonded leather, must not be treated with leather care products, since they will destroy the PU/Bonded leather.

**Figure 8: Pictogram to be used together with warning text for products covered in PU/bonded leather. Size of pictogram must be 40 mm. in high.**

### 1.3.13 Mandatory warning regarding products covered in genuine leather

This warning text and related pictogram (figure 9) must be in all assembly instructions and manuals if the product is covered in genuine leather.

#### GENERAL INSTRUCTION FOR FURNITURE WITH GENUINE LEATHER!

Wipe clean with a damp cloth. Use only clean water.

Wipe dry with a clean soft cloth.

The leather must be treated with a suitable leather cream before use and then 2-4 times a year after need.

Do not use detergents, solvents or other chemicals on leather, as this may damage the leather.

Do not place furniture with real leather in front of heat sources and protect them from direct sunlight, as this will dry the leather.

**Figure 9: Pictogram to be used together with warning text for products covered in genuine leather. Size of pictogram must be 40 mm. in high.**

Document type:

# JYSK Standard

Doc.no: JYSK 5001

Subject:

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

Revision: 18

### 1.3.14 Mandatory warning regarding products covered in fabric

This warning text and related pictogram (figure 7) must be in all assembly instructions and manuals if the product is covered in fabric.

#### GENERAL INSTRUCTION FOR FURNITURE WITH FABRIC!

Wipe clean with a damp cloth. Use only clean water.

Dust and dirt can be vacuum cleaned or wiped with a clean soft cloth.

Do not use detergents, solvents or other chemicals on fabric as this may cause discoloration.

However, certain removable fabrics may be washed, but in such cases there will ALWAYS be a washing instruction on the fabric.

### 1.3.15 Mandatory warning regarding products with oiled surfaces.

This warning text and related pictogram (figure 10) must be in all assembly instructions and manuals if the product is with oiled surfaces.

#### GENERAL INSTRUCTION FOR FURNITURE WITH OILED SURFACES!

##### Daily cleaning:

Wipe clean with a damp cloth. Use only clean water.

Wipe dry with a clean soft cloth.

Do not use detergents, solvents or other chemicals on oiled surfaces, as this may cause discoloration.

Color stains from eg. red wine or the like must be wiped off immediately.

##### Maintenance:

Furniture with an oiled surface must be treated with a suitable furniture oil as needed, but at least twice a year.

Start by cleaning the furniture according to the above instructions for daily cleaning.

Smaller stains or scratches can be removed with sandpaper grain 180. Always sand along the wood's veins. Always use great care on veneered parts as the veneer is often less than 1 mm. in thickness. Avoid grinding on edges and corners.

The surface must be completely clean and dry before applying the oil.

Apply oil with a clean lint-free cloth. The oil must always be applied along the grains of the wood.

Let the oil soak for 15 minutes. The surface often feels rough after oiling. This is a natural reaction due to the wood's fibers rising. Sand easily with sandpaper grain 220-280 and along the grains of the wood.

Remove excess oil and dust from sanding with a clean lint-free cloth.

Rinse with a clean lint-free cloth until the desired surface is obtained.

Let the furniture dry for at least 24 hours before using it again.

### 1.3.16 Mandatory warning – WEEE information

WEEE information for Electrical and Electronic equipment must be given in accordance with [JYSK 4005](#).

### 1.3.17 ~~Mandatory warning JYSK 10187 – WEEE information text for Electrical and Electronic equipment with batterie(s)~~

This warning text and related pictogram (figure 11) must be in all assembly instructions and manuals for Electrical and Electronic equipment supplied with batterie(s)

#### ~~Disposal of waste equipment by users in private households in the European Union.~~

~~This symbol indicates that this product including batteries must not be disposed of with your other household waste. Batteries, electrical and electronic equipment contain substances which may cause damage to human health and environment if not recycled correctly. It is your responsibility to hand over to a designated collection point for recycling of waste batteries, electrical and electronic equipment. When handing over for correct recycling you help to prevent these products straining nature and environment unnecessarily and to protect human health. For more information regarding correct disposal, please contact your local city office, your household waste disposal service or the store where you purchased this product.~~

### 1.3.18 ~~Mandatory warning JYSK 10188 – WEEE information text for Electrical and Electronic equipment without batterie(s)~~

This warning text and related pictogram (figure 11) must be in all assembly instructions and manuals for Electrical and Electronic equipment supplied without batterie(s)

#### ~~Disposal of waste equipment by users in private households in the European Union.~~

~~This symbol indicates that this product must not be disposed of with your other household waste. ### 1.3.19 Warnings regarding toys and electrical components

Warnings regarding electric components and toys must always follow the current standard for the specific product – be aware that standards can differ in the countries in which JYSK products are sold.

For electric components please read JYSK 4005 and for toys JYSK 2001 Contact [compliancequality@JYSK.com](mailto:compliancequality@JYSK.com) if any questions.

### 1.3.20 Translated warnings for assembly instructions and manuals

As normally JYSK provides translation of some of the most commonly used warnings, these can be found in the [DOWNLOADS](#) section of JYSK Supplier Guideline for download.

### 1.3.21 Pictograms for warnings in assembly instructions/manuals

The pictograms to be used together with some of the warnings are available for download. It is most important that the correct pictogram is used for the specific warning.

All pictograms can be found in the [DOWNLOADS](#) section of JYSK Supplier Guideline for download. It can be found as separate files, but also with pictogram and warning text combined in one document.

## 1.4 Tools and fittings

Section 4 starts after the warnings section and consists mainly of pictograms. In this section customer is shown which tools and fittings are needed for assembling the product.

### 1.4.1 Tools in assembly instructions

Any tools needed for assembly of the product and which are NOT included in the fitting box must be shown with a pictogram in the tool area. If a special tool may NOT be used for assembly etc. screw machine, it must be shown in the tool area as well, but with a cross over the pictogram

NOTE: Tools which are included in the fitting box etc. a Hex-key or spanner, must be considered as a fitting and must be shown in the fitting area.

JYSK has developed below JYSK line of tool pictograms for mandatory use.

In case you need a tool which is not shown below, please contact

[compliancequality@JYSK.com](mailto:compliancequality@JYSK.com) and we will design a pictogram for it.

Tool pictograms can be found in the [DOWNLOADS](#) section of JYSK Supplier Guideline for download.

Mandatory JYSK tool pictogram:	Explanation:
	Screw driver f/PZ screws
	Screw driver f/slot screws
	Soft hammer.
	Carpenter's hammer.
	Screw machine

### 1.4.2 Fittings in assembly instructions

It is allowed for the supplier to use their own pictograms or drawings from CAD software to show the fittings. All pictograms must be clearly understandable and **look exactly like the fittings used for assembling**.

In order for the customer to easily recognize the different fittings, all fittings should be shown in 3D view and all in same angle/direction. Screws must be placed with visible head, so customer clearly can see which type of screwdriver is needed for the screw.

The fitting overview is made as a table, with cells 40x40 mm. Fitting pictograms must be scaled to fit the cells. In order for the customer to be able to recognize all fittings, the large fittings (drawer runners etc.), can be shown in 2 cells merged to 1 big cell. But this should only be done when really needed. The fitting pictogram must be placed in the center of the cell.

Above the fitting pictogram, all fittings must be named with capital letters starting with A, B, C... (English alphabet) and the number of the fitting included (e.g. Ax42).

Means letter and number of the fitting must be shown in top of each cell.

NOTE: We do NOT want any fittings named I or O. The reason for this is, that "I" can be exchanged with a "drawing line" and "O" can be exchanged with a "drilling hole".

If there are more than 24 different fittings, you may continue with AA, AB, AC and so on....

Below the fitting pictogram, the size of each fitting must be shown.

A dowel, screw, bolt or washer size is shown as diameter x length (e.g. Ø8x30 mm.)

Ø is the indicator for diameter.

A corner brace or similar fitting size is shown as length x width x high (e.g. 75x25x15 mm.)

All text for fittings must be font Verdana size 10

See an example of different fittings and how to show the fitting size in figure 10.

If there are two or more types of hinges in the fitting box, the different types must be very easy to tell apart in the assembly instruction. We require the hinge and hinge back plate to be pre-assembled, to avoid assembly mistakes.

For runners, which are shipped as one piece, but needs to be separated during the assembly process, it is very important that it is shown as one piece in the fitting overview. More info about how to show it can be split can be found in the Assembly steps section.

If necessary, it is OK to spread fitting overviews over more pages.

## 1.5 Special requirements and exploded 3D view of product parts

Section 5 of the assembly instruction is showing a few but important special requirements. Also it shows an exploded 3D sketch of the entire product.

### 1.5.1 Special requirements in assembly instructions

If there are any special requirements to be met to assemble the product, it must be shown in the special requirements area. One special requirement is if 2 or 3 persons are needed for assembly. NOTE: If the product can be assembled by 1 person only, it is NOT a special requirement and shall not be shown as such.

For some products, a minimum high is required for assembling, e.g. height for wardrobes assembled lying down and erected afterwards. In such case a special requirement pictogram must show the minimum high required.

JYSK has developed below JYSK line of special requirements pictograms for mandatory use. In case you have to add a special requirement which is not shown below, please contact [compliancequality@JYSK.com](mailto:compliancequality@JYSK.com) and we will design a pictogram for it.

Special requirements pictograms can be found in the [DOWNLOADS](#) section of JYSK Supplier Guideline for download.

Mandatory JYSK Special requirements pictogram:	Explanation:
	2 persons needed for assembly. (Do NOT show any pictogram if the article can be assembled by 1 person only).
	3 persons needed for assembly. (Do NOT show any pictogram if the article can be assembled by 1 person only).
	Minimum high required for assembly. NOTE: The correct high needed must be shown on the pictogram

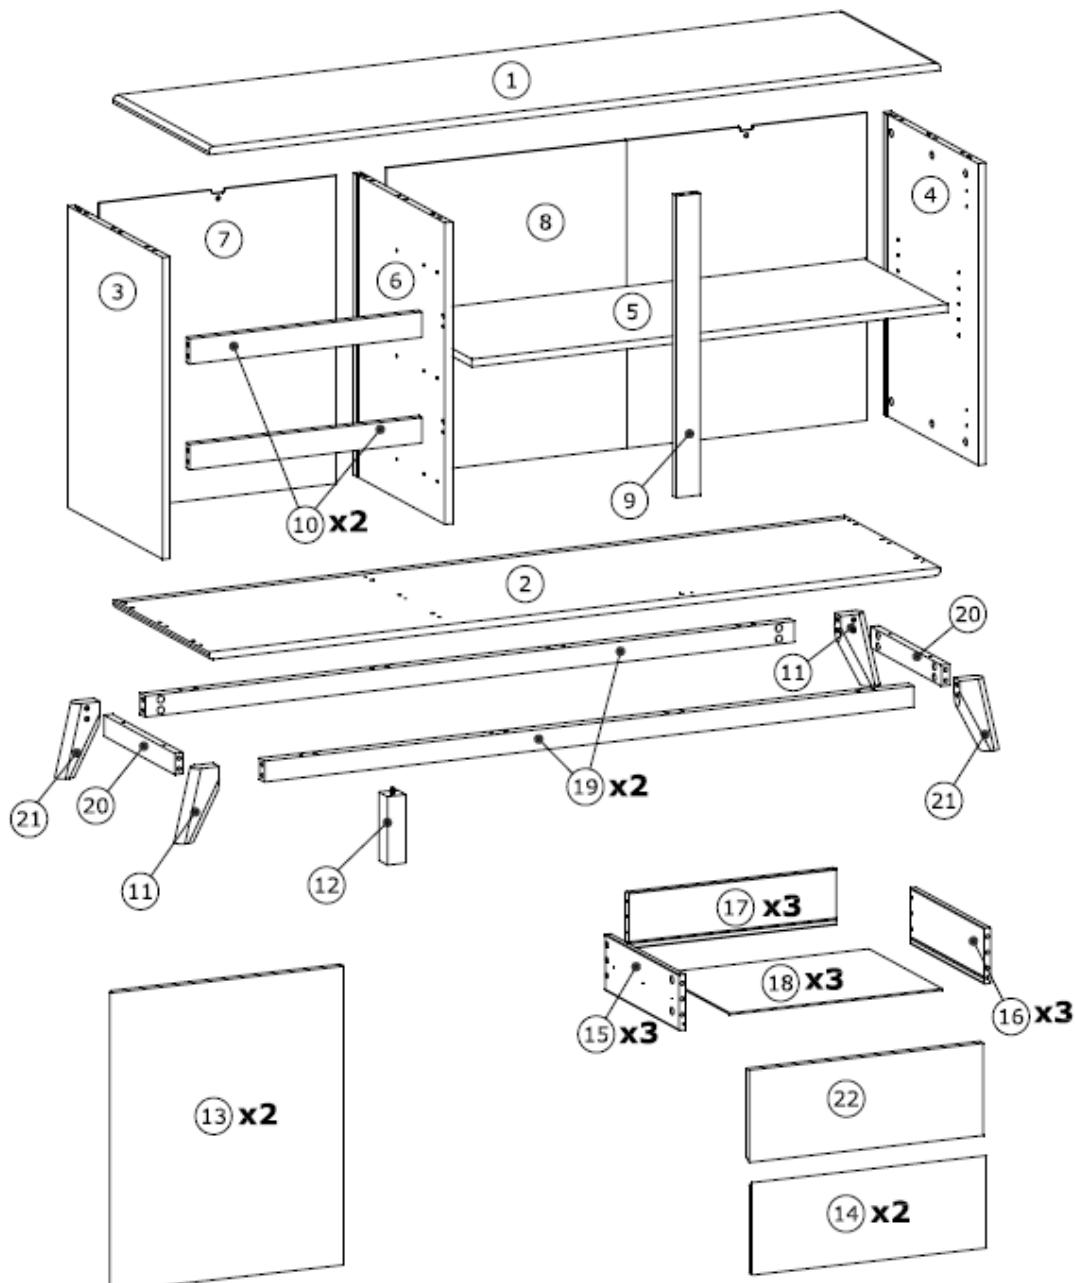

### 1.5.2 Exploded 3D view of product parts in assembly instructions

Below the special requirements area, there must be an exploded 3D sketch of the entire product. On this sketch, each product parts must be numbered with numbers starting with 1, 2, 3.... All part numbers must be placed in a circle and must be font Verdana size 10.

Identical parts must of course be numbered with the same number.

In the exploded view, identical parts can be shown with just one part number circle and the total number of parts included (e.g. 11 x3), or it can be shown with a part number circle on each part. See part 10 and part 11 as examples in figure 11.

In figure 7 you can also see an example of how to show a special requirement and an exploded 3D view.

**Figure 13: Example of a special requirement and exploded 3D view.**

## 1.6 Content of boxes

Section 5 of the assembly instruction should show clearly which parts are placed in which box.

### 1.6.1 Content of boxes with 2D view of product parts

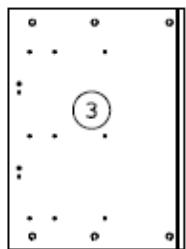

To make it easier for the customer to identify and check if all parts are included, it is very important that the assembly instructions show clearly which parts are in which box.

In section 6, the product parts must be shown with 2D sketches and with the part size written below the part. Each product parts must also be numbered with numbers starting with 1, 2, 3.... If there are more than 1 pc. Of a part, the part is shown only once and then the total number of the part is added (e.g. 5 x2).

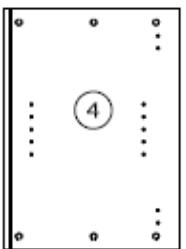

All part numbers must be placed in a circle and must be font Verdana size 10.

NOTE: Fittings and the assembly instruction MUST always be placed in **box 1**.

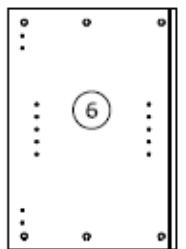

See an example of how to show the content of boxes in 2D view in figure 12.

**Box 1/2:**

Doc.no: JYSK 5001

Subject:

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

Revision: 18

## 1.7 Assembly steps

Section 7 of the assembly instruction is showing the assembly steps 1 by 1. All steps must include step number, fittings and tools to be used and a 3D drawing showing the action to be performed on the individual step. Some steps needs a special detail view or warning to be added as well.

NOTE: A maximum of two assembly steps on each side is allowed.

It is very important the assembling of a product is done in a logical way. Means the assembling steps shall also be shown in a logical way. It is important that the customer shall handle each part as few times as possible, as each handling can result in a scratch or damage on corners and edges.

The logical assembling way for a sideboard is normally:

- a. Building up the cabinet staring from legs, bottom plate, side panels, top plate incl. anti-topple bracket.
- b. Assemble and mount the drawers.
- c. Assemble and mount the doors.
- d. Fix sideboard to the wall with the anti-topple bracket (in some cases this must be done before mounting the drawers)
- e. Add any not fixed shelves
- f. Adjust the doors, drawers and level out the sideboard with adjustable feet etc.

The logical assembling way of a complete drawer is normally:

- a. Mount the excentric bolts to the drawer front.
- b. Add the needed dowels and if possible drawer runners to the drawer sides.
- c. Mount the drawer sides to the drawer front.
- d. Add the drawer bottom and in some cases the drawer bottom support.
- e. Mount the drawer back.
- f. Mount the handle.

The logical assembling way of a door is normally:

- a. Mount any magnetic catches, dust list etc. to the back side of the door.
- b. Mount the complete hinge.
- c. Mount the handle.

### 1.7.1 Top bar on assembly steps

The top bar on each assembly steps must be built up as shown in figure 9

The top bar include step number, fittings and tools to be used on the current step.

The top bar consist of:

- a. A circle app. Ø20 mm. with the assembly step number inside and written in font Verdana size 36
- b. A box where maximum 4 different fittings can be shown.  
Size of each fitting box is app. 24x24 mm. Above each fitting is shown the fitting letter and quantity to be used on the current step (e.g. E x 14). Below each fitting is shown the fitting dimension (e.g. Ø3,5x20 mm.). All text related to the fitting must be font Verdana size 8.
- c. To the right, the tools needed for the current step is shown.  
NOTE: JYSK standard tool pictograms must be used for tools

If a step does not require any use of fittings or tools, the top bar box is not needed and only the step number shall be shown (see figure 15).

Document type:

# JYSK Standard

Doc.no: JYSK 5001

Subject:

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

Revision: 18

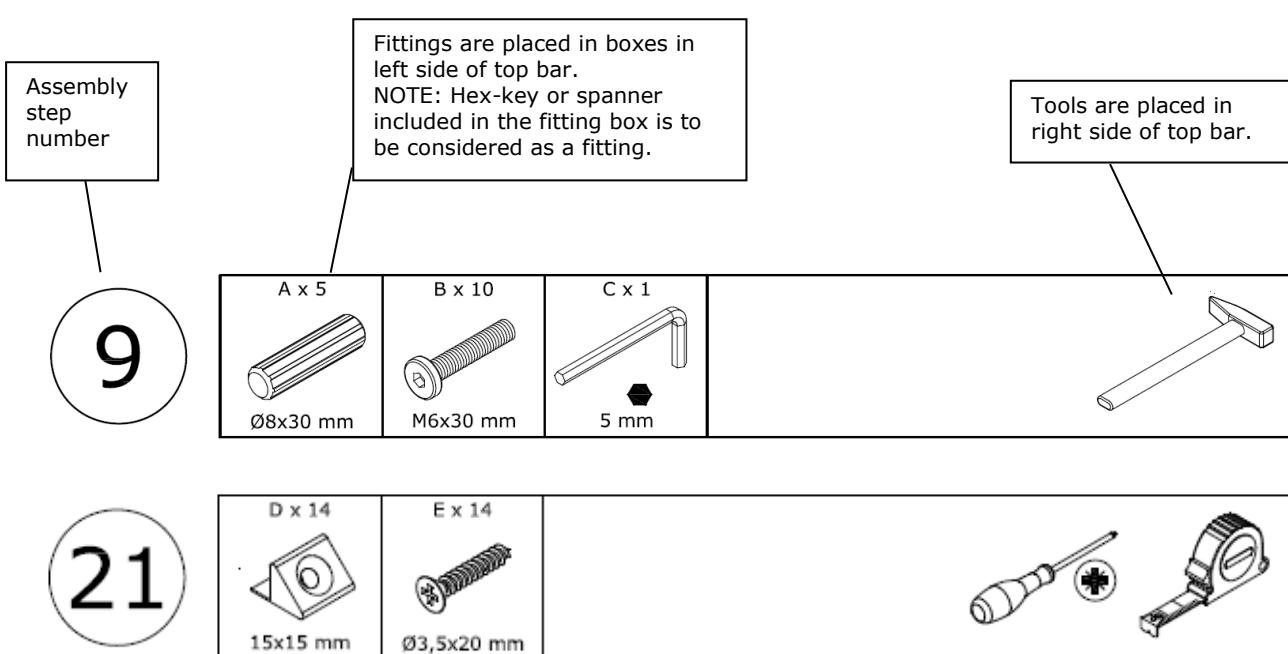

Figure 15: Examples of a top bar on assembly step

### 1.7.2 3D drawings on assembly steps

The 3D drawings on each assembly step must be done in correct proportions and scaling.

The fittings shown in the top bar should all appear on the 3D drawing as well.

It is important that it is clearly shown how and where the fittings should be placed and in which holes to mount it. If the customer can make a mistake when doing this, it is important that the warning triangle, a high light or a detail view is inserted. This in order to make it more clear what the customer should be aware of (see more about detail view in 1.6.3).

The tools from the top bar shall only be shown on the 3D drawing if really needed. Normally it is easy for the customer to understand which tool must be used for each fitting.

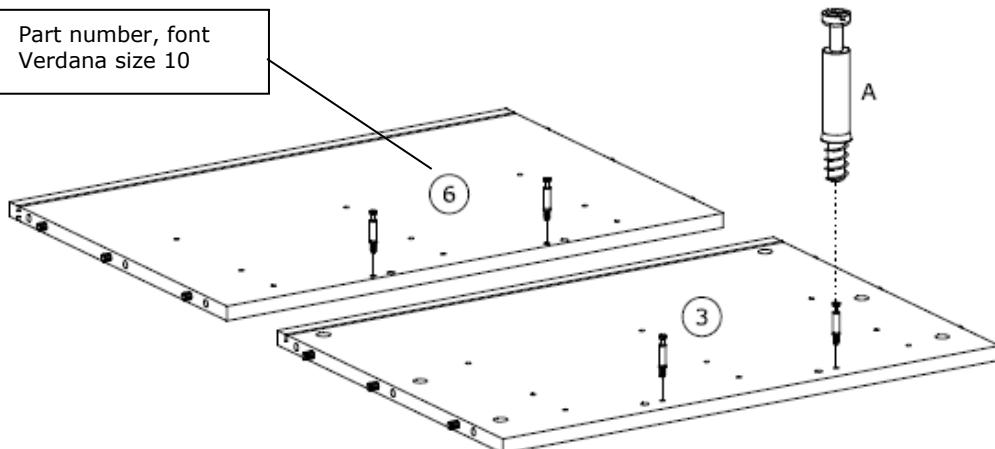

NOTE: Hex-key and spanner included in the fitting box is to be considered as a fitting. It is NOT a tool.

Circle w/part number shall be placed on all parts that have a handling on the current step. It is very important NOT to show too many parts on each step. It is better to make many simple steps instead of less and complicated steps.

**10**

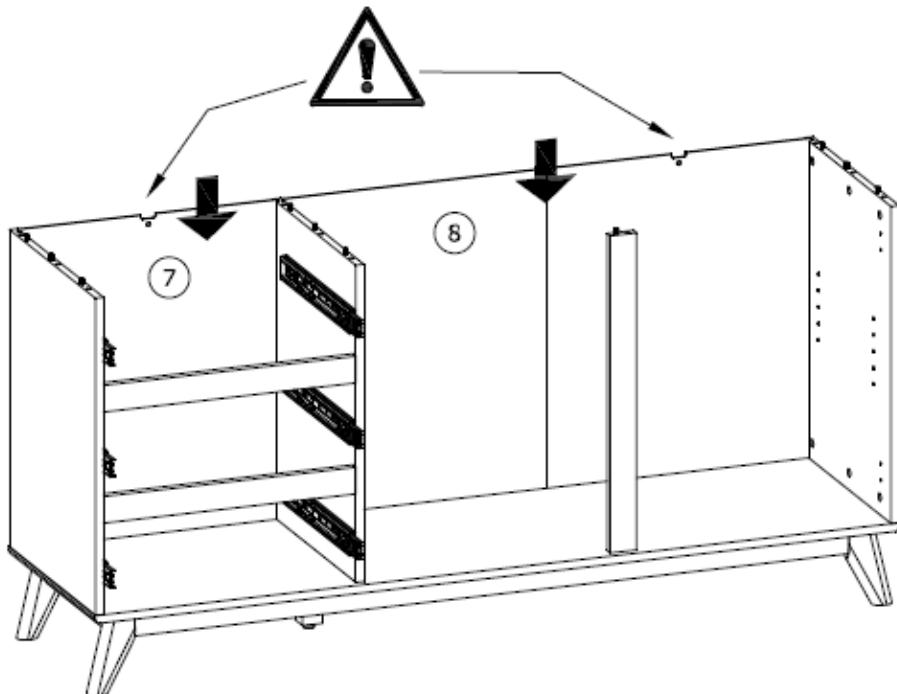

Part number, font  
Verdana size 10

**Figure 16: Example of an assembly step w/top bar and 3D drawing.**

**18**

**Figure 17: Example of an assembly step w/3D drawing and warning triangle.**  
**Note: The top bar box is deleted as no fittings or tools are needed for this step.**

Date: 20.04.2024

Revision: 18

### 1.7.3 High lights on assembly steps

If some details are hard to see or understand from the 3D drawing in the assembly steps, a high light can be added. A high light is used to show details in a larger scaling. It is important, that the high light shown on the step is drawn in the same angle as on the 3D drawing the high light is scaled from. This in order not to create an unnecessary confusion for the customer.

In general the use of high lights should be limited and shall only be used when it is absolutely needed.

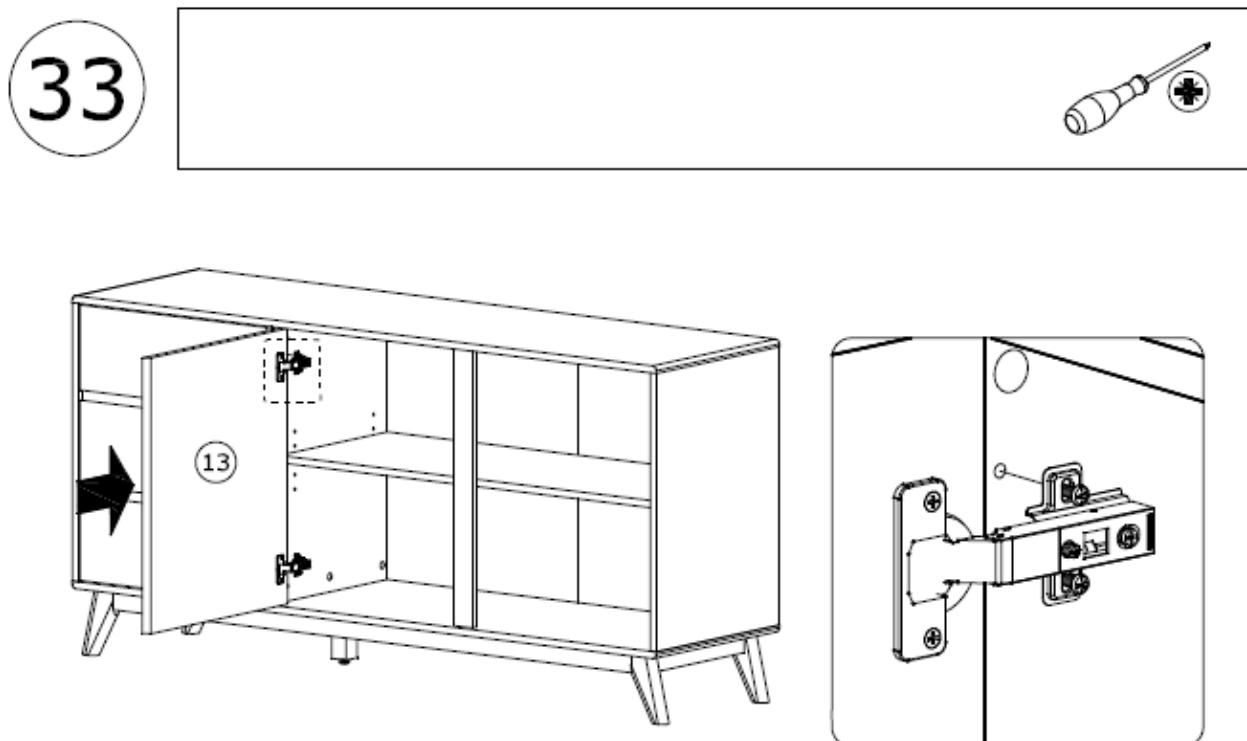

Figure 18: Example of an assembly step with a high light.

### 1.7.4 Detail views on assembly steps

When needed on assembly steps, a detail view must be added.

A detail view is a small instruction that shows some extra information – e.g. a small warning to avoid wrong mounting or how a special fitting works.

If the detail view is about how a fitting works, it only has to be shown on the assembly step where the fitting is used for the first time. Means the same detail view, shall NOT be shown on all steps where this fitting is used.

JYSK has developed below JYSK line of detail view pictograms for mandatory use.

In case you have to add a detail view which is not shown below, you are allowed to make your own pictogram or you can contact [compliancequality@JYSK.com](mailto:compliancequality@JYSK.com), and we will design a pictogram for it.

Detail view pictograms can be found in the [DOWNLOADS](#) section of JYSK Supplier Guideline for download.

### 1.7.5 Special detail views on assembly steps

When needed on assembly steps, a special detail view must be added.

A special detail view is an illustration that shows some extra special information – e.g. how to adjust hinge, feet or push fitting.

JYSK has made below special detail view illustrations for inspiration.

Special detail view examples can also be found in the [DOWNLOADS](#) section of JYSK Supplier Guideline for download. However, in most cases, the illustrations must be customized to match the details of the individual furniture.

JYSK Special detail view examples:	Explanation:
 $XX = YY \equiv 90^\circ$ 	<p>90° assembling of furniture. (To be used on the step where customer mount the back panel). The way to secure a 90° assembling is to use a measure tape and take the diagonal (from corner to corner) distance and compare these, the furniture is in a 90° angel, when <math>XX=YY</math>.</p> <p>The back panel must be mounted while the furniture is standing up. In cases where this is not possible or this is not the preferred way, it can be mounted while the furniture is lying down.</p>
	<p>Separate drawer runners. To be used for runners, which are supplied as one piece, but needs to be separated during the assembly process.</p> <p>As the illustration shows, the runner H is separated in 2 different parts and on the following steps it must be named H1 and H2.</p> <p>It is of course very important the runner on the illustration match the runner used for the individual furniture.</p>

Revision: 18

XX

XX

Push fitting adjustment.

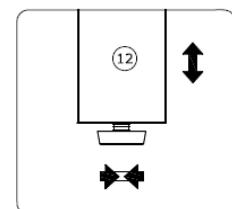

If the furniture has push fittings, an illustration of how to adjust the door in and out, must be added on the last assembly steps.

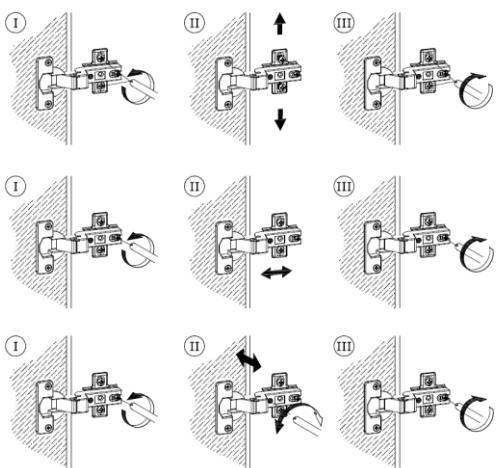

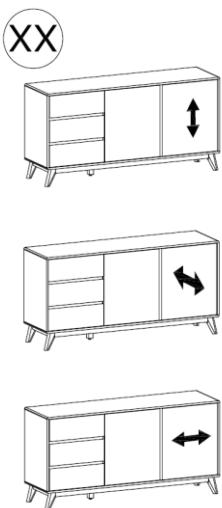

Adjustable foot adjustment.

If the furniture has an adjustable foot, an illustration of how to adjust the furniture up and down, must be added on the last assembly step.

Note the standard tool spirit level is used to indicate the furniture must be adjusted to stand 100% horizontal.

The illustration is also needed if the adjustable foot is placed on a middle support leg e.g. on a sideboard or on a bed.

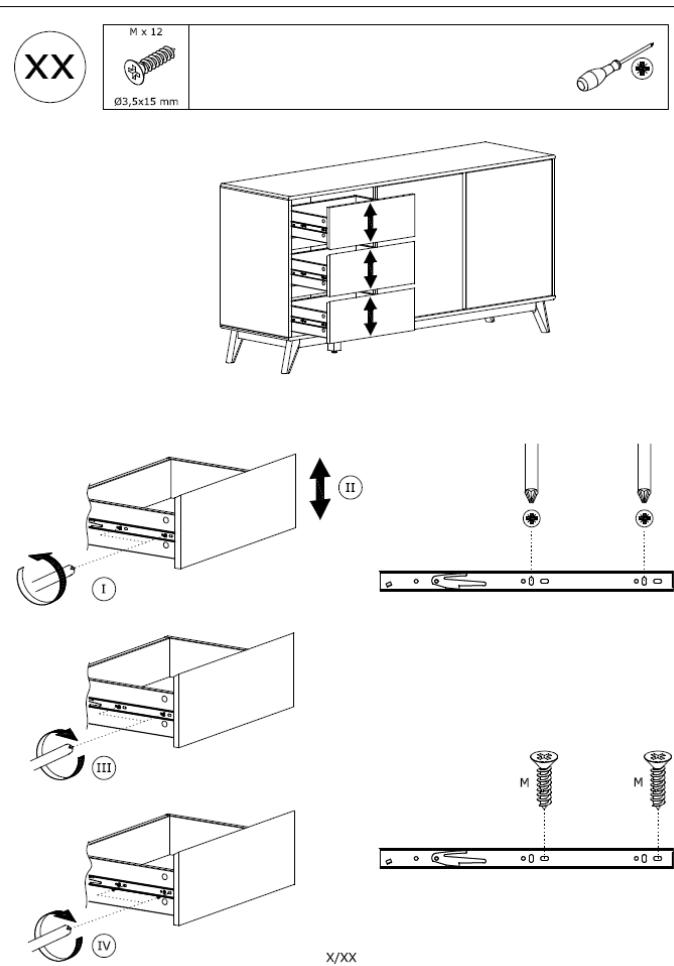

### Hinge adjustment.

If the furniture has doors with adjustable hinges, an illustration of how to adjust the doors up and down, in and out and sideways, must be added on the last assembly step.

This illustration is 1 full step in the assembly instruction and the size of the illustration must be minimum ½ of an A4 page.

It is of course very important the hinge and the furniture on the illustration match the individual article.

### Drawer runner adjustment.

If the furniture has drawer runners which can be adjusted, an illustration of how to adjust the drawers up and down, must be added on the last assembly step.

This illustration is 1 full step in the assembly instruction and the size of the illustration must be minimum ½ of an A4 page.

It is of course very important the drawer runners and the furniture on the illustration match the individual article.

## 1.8 Last page

Section 7 and last page of the assembly instruction is the page where the maximum load is shown. Also the Info-tri for paper, material symbol, JYSK name, address, phone no. and CVR no. must be shown on this page.

### 1.8.1 Maximum load on horizontal surfaces

The pictograms to be used for showing maximum loads on horizontal surfaces and cloth rails are shown in examples below:

Pictogram:	Explanation:
	<p>Maximum load for the part, shown as an equally distributed load. The symbol for maximum load must be followed by the exact weight load for the part shown in kilos (kg).</p> <ul style="list-style-type: none"><li>For parts with the same weight load, the two symbols only needs to be shown once and then linked with reference lines to parts.</li><li>Different loads needs to be shown individually, linked with reference lines to the part.</li><li>Maximum load <b>HAS</b> to be shown on each horizontal surface in storage furniture (shelves, drawers, top and bottom)</li><li>Maximum load <b>HAS</b> to be shown on hanger rails and clothes rails, (still a sticker must be added on the cloth rail itself).</li><li>Maximum load <b>HAS</b> to be shown on all tables (dining tables, coffee tables, console tables, desks and so).</li><li>Maximum load is <b>NOT</b> allowed to be shown on any seating products (chairs, arm chairs, office chairs, pouffes, stools, sofas and so).</li><li>Maximum load is <b>NOT</b> allowed to be shown on any kind of beds (sofa beds, day beds, bed frames, mattresses and so on).</li><li>Maximum load is <b>NOT</b> allowed to be shown on products which are wall mounted (wall shelves, coat racks, floating shelves, picture ledges and so).</li></ul>

### 1.8.2 General rules for calculation of Maximum load

At JYSK we want a uniform determination of max. load from product to product. Therefore, we have set up the following rules for determination of max. load on assembly instructions:

Determination of max. load on horizontal surfaces:

- Top plates: max. 40 kg.
- Shelves: max. 10 kg.
- Bottom plates: max. 20 kg.
- Drawers: Max. 5 kg.
- Dining table- and desk tops: max. 40 kg.
- Coffee - and side table tops: max. 20 kg.

Note: Garden furniture max load must comply with requirements in [JYSK 1009](#).

Revision: 18

However, for extra product safety, the maximum load displayed may never be greater than 90 % of the load used during test ( $0.65 \text{ kg/dm}^2$ ) for a horizontal surface.

See below examples of how to determinate the max. load:

Top plate with size 1600x450 mm.:

$16 \text{ dm.} * 4,5 \text{ dm.} * 0,65 \text{ kg.} * 90\% = 42,12 \text{ kg.} \approx \mathbf{40 \text{ kg.}}$  (40 kg. is the max. load for top plates)

Top plate with size 1250x420 mm.:

$12,5 \text{ dm.} * 4,2 \text{ dm.} * 0,65 \text{ kg.} * 90\% = 30,71 \text{ kg.} \approx \mathbf{30 \text{ kg.}}$

Glass shelf with size 770x340 mm.:

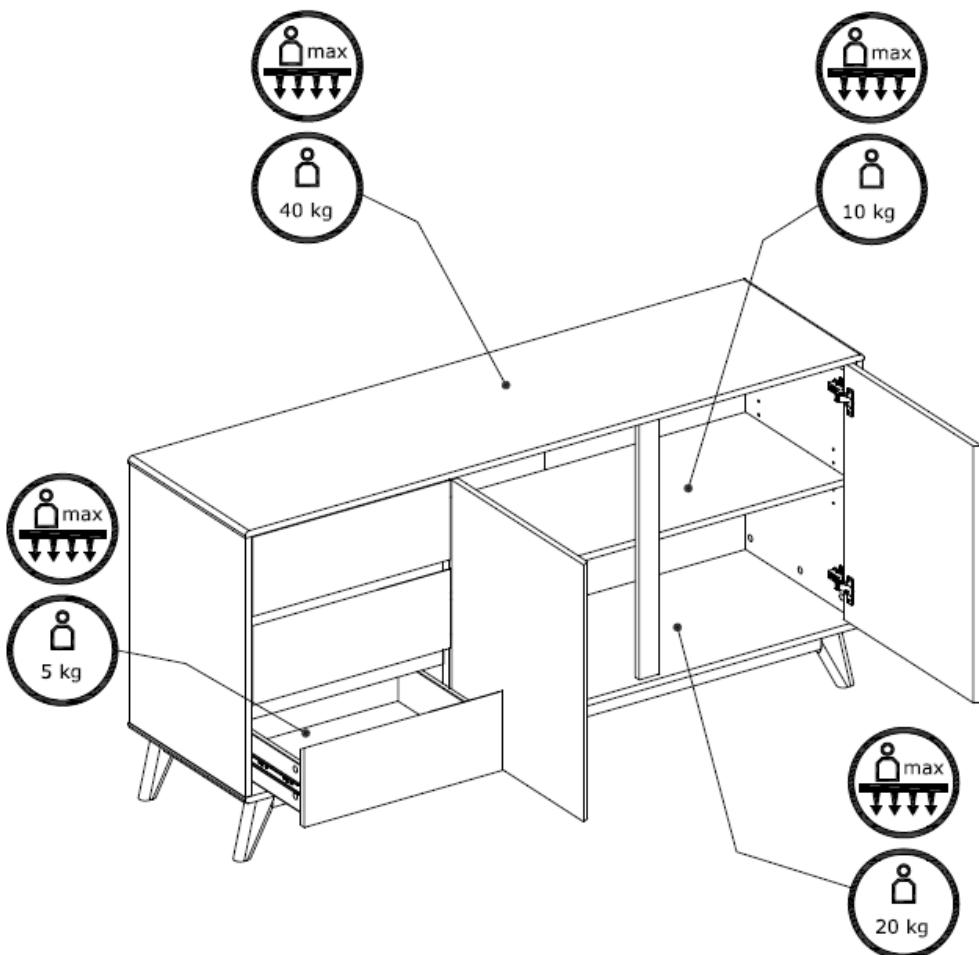

$7,7 \text{ dm.} * 3,4 \text{ dm.} * 0,65 \text{ kg.} * 90\% = 15,32 \text{ kg.} \approx \mathbf{10 \text{ kg.}}$  (10 kg. is the max. load for shelves)

Determination of max. load on hanger- and clothes rails:

- Max load 20 kg. pr. Meter. Means a rail which is 80 cm. in length has a max. load of  $0,8 \times 20 = 16 \text{ kg.}$

Determination of max. load on coat stands:

- Max load 10 kg. pr. "arm". If 1 arm has 2 hooks, it is 5 kg. pr. hook.

**Figure 23: Example of how to state the maximum load**

Doc.no: JYSK 5001

Subject:

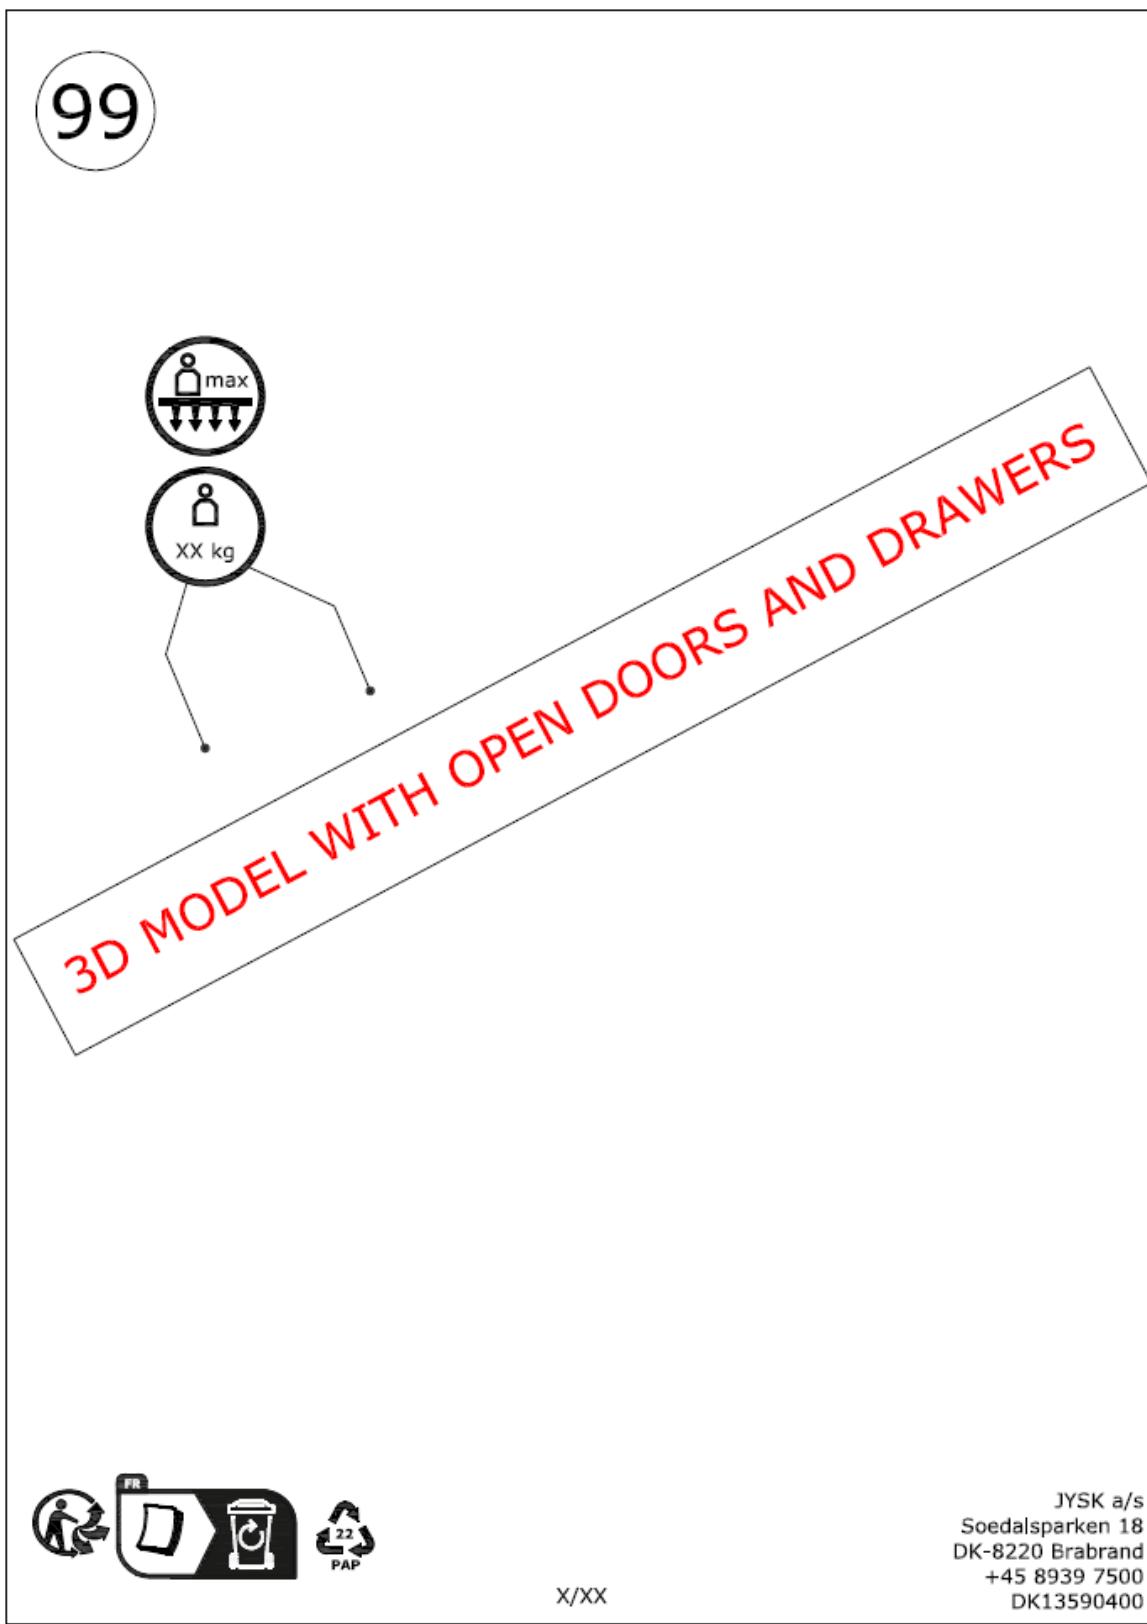

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

Revision: 18

## 1.9 User instruction/manual for use

This section is relevant if a specific instruction regarding use of a product must be stated. At JYSK we only require a user instruction if the product has more than one function or if it is not self-explanatory. Chairs, tables, wardrobes, chest of drawers, beds etc. are considered self-explanatory.

If there is electric components in a product e.g. a massage chair, user instructions shall always be included.

**Instruction Manual**

- Function Description:** Press the "POWER" button to activate the remote control. Select the desired massage mode by pressing the "MODE" button. Each massage mode will run for 15 minutes and it will stop automatically.

- Key Description:**

POWER key	: ON/OFF switch.
INT key	: Intensity switch - High/Low.
MODE key	: Massaging mode. <ul style="list-style-type: none"><li>AUTO</li><li>KNEADING</li><li>PULSATE</li><li>TAPPING</li><li>ROLLING</li></ul>
BACK key	: Back area ON/OFF switch.
WAIST key	: Waist area ON/OFF switch.
- Warning:** Switch power off if not in use.

Disposal of waste equipment by users in private households in the European Union. This symbol indicates that this product must not be disposed of with your other household waste. Electrical and electronic equipment contain substances which may cause damage to human health and environment if not recycled correctly. It is your responsibility to hand over to a designated collection point for recycling of waste electrical and electronic equipment. When handing over for correct recycling you help to prevent these products straining nature and environment unnecessarily and to protect human health. For more information regarding correct disposal, please contact your local city office, your household waste disposal service or the store where you purchased this product.

### 1.10 Requirements for Assembly Instructions, user instruction and manuals for Garden furniture

For garden furniture the assembly instructions must comply with the above sections regarding warnings, layout, pictograms etc.

Besides that, the assembly instructions, user instruction and manual must comply with the requirements in [JYSK 1009](#).

Document type:

# JYSK Standard

Doc.no: JYSK 5001

Subject:

## Appendix K - Assembly instructions and manuals

Date: 20.04.2024

Revision: 18

## 2 Example of a good and informative assembly instruction

On the following pages, you will find four examples of good and informative assembly instructions made according to appendix K:

- JYSK 10060 - Best practice AI for a sideboard
- JYSK 10061 - Best practice AI for a headboard
- JYSK 10062 - Best practice AI for a mattress
- JYSK 10063 - Best practice AI for a sofa

The examples are complying with the JYSK demands regarding assembly instructions.  
Please note that the example has been scaled to fit the layout of this standard.

Below are listed key requirements for any assembly instruction/manual:

- Always A4 format
- Always portrait page layout – use the JYSK standard AI templates
- Always use Font Verdana
- Always ensure correct JYSK logo
- Always use relevant warnings
- JYSK prefer the use of pictograms instead of text
- All text must be translated (not Product name)
- All pages must have a frame, which is at least 10 mm from paper edge
- All pages must have page number
- At least one staple (upper left corner) must keep the pages together
- All text for warnings must be at least Font size 6 – and always clearly readable
- It is always suppliers responsibility that assembly instructions/manuals are correct, handwritten corrections and so forth are not accepted by JYSK
- Saved as a PDF and named with the JYSK name of the product and the JYSK product number.

**PT:** INFORMAÇÃO IMPORTANTE!

**WARNING TO AVOID SCRATCHES!**

In order to avoid scratching this furniture should be assembled on a soft layer - could be a rug.

**DE:** AUF UMSTÄNDEN VERMEIDEN, STOßT DIESES MOBILIEN AUF EINER WEICHEN UNTERLAGE MONTIERT WERDEN (z. B. TEPPICH).

**NO:** OM KJØRER IKKE SKRÅTT, SØTT DITT MØBLER PÅ ENER WEICHE UNTERLAGE MONTIERT WERDEN (z. B. TOPPICH).

**SE:** VÄRNING! NÅR DU MONTERAR RAFFERNA, SÄTT DEM PÅ EN MÄSSIG UNDERLÄGE, EXEMPELVIS EN MÄTTA.

**FI:** VARO HUOMIOON, JOSKA TÄNNI KÄTÄT JOHDOINA ALUSTA, ESIMERKIKSI matto päästä.

**PL:** OSTRZEGIENIE WWS. UZESTRZYGNI, BYC MONTOWANY, SKŁADANY NA MIĘKKIM PODŁOGĘ - np. na kocie.

**CZ:** VAROVÁNÍ: TYKAJTE SE PODĚLKAMI NEBO KRYTEM PODLAHOU - např. na koberec.

**HU:** KARCOLÁSOK HIGYELŐDÉSE - FEJVELÉMI: A szobabútorokat nem szabad a szőnyegen vagy párás kobercen tárolni.

**NL:** WAARSCHUWING OM KRASSEN TE VERMIJDEN!

Om u wilt voorkomen dat u meubel beschadigt, moet u het geassembleerd worden op een zachte ondergrond - zoals een tapijt.

**SK:** VÝSTRAHA TÝKAJÚCA SA PREKľADANIA MÔBLÍVACÍM:

Sklopnite môblívia na miestnom podklade, napríklad na koberec.

**FR:** AVERTISSEMENT POUR ÉVITER LES RAYURES!

Levez le mobilier sur une surface douce (un tapis, par exemple).

**SE:** KAKO PREPREĆIĆ PRASKE!

Da bi se izbjegao oštećenja, postavite mjesto podlogu - na primjer, tepih.

**HR:** UPORUŽENJE ČE IZBRUŠAVANJU OGREBOTINAI!

Nađite ugodnu podlogu, na kojoj se može montirati i sklopiti bez oštećenja.

**IT:** AVVERTENZA PER EVITARE I GRAFFII!

Per evitare graffi, posizionare il prodotto su una superficie morbida (come ad es. un tappeto).

**ES:** ADVERTENCIA PARA EVITAR RAYADURAS!

Para evitar rayaduras, coloque el producto sobre una superficie suave (probablemente una alfombra).

**BA:** UPORUŽENJE ZA SPREČAVANJE NASTANKA OGREBOTINAI!

Da biste izbjegli oštećenja, postavite mjesto podlogu - na primjer, tepih.

**KS:** ПРЕДУПРЕЖДЕЊЕ ЗА ДЕРГАВАЊЕ ОГРЕБОТИЦИ!

Избегнете да монтирате и склопите на тврдом поду, например, на коврик.

**RO:** ATENȚIE ÎN CĂZUL ÎNCADRĂRII ÎN VÂRFAREA OGREBOTICII!

Păstrați mobilierul și încărcați-l pe o suprafață moale, de exemplu, pe un covor.

**BG:** ПРЕДУПРЕЖДЕНИЕ ЗА МЕСЪУДИ БА НА ГРАСКОТНИЦИ!

Задържете мебелите и ги складявайте само на твърда подова повърхност - например килим.

**GR:** ΕΛΛΗΝΙΚΑ ΗΓΕΤΟΥΣΑΙ ΕΠΙΧΕΙΡΗΣΗΣ

Για την αποφύγεση πραγματώνων, το κλείστε σε μια μαλακή επιφάνεια (π.χ. στριφτό).

**PT:** PARA EVITAR RISCOS, ESTE MOBILIAR DEVE SER MONTADO SOBRE SUPERFÍCIE MACIA (por exemplo, tapete).

**RU:** ПРИ МОНТИРОВАНИИ И СКЛАДЫВАНИИ МОБИЛЕЙ ИСПОЛЬЗУЙТЕ МЯГКУЮ ПОДЛОГУ.

**TR:** Bu ürünleri monte etmek ve saklamak için yumuşak bir taban kullanın.

**CN:** 請勿將此家具置於硬質地面上組裝或收納。
